Contents

Review Paper
1 The elimination of open defecation and its adverse health effects: a moral imperative for governments and development professionals
Duncan Mara

Review Paper
13 Socio-psychological determinants for safe drinking water consumption behaviors: a multi-country review
Jonathan Lilje and Hans-Joachim Mosler

Review Paper
25 Towards sustained sanitation services: a review of existing frameworks and an alternative framework combining ecological and sanitation life stage approaches
Ni Made Utami Dwipayanti, Tri Dung Phung, Shannon Rutherford and Cordia Chu

Review Paper
43 Message, method and messenger – a literature survey and typology for planning strategic advocacy
Tanvi Nagpal and Rachel Rose

Research Paper
56 Sustained use in a relief-to-recovery household water chlorination program in Haiti: comparing external evaluation findings with internal supervisor and community health worker monitoring data
Lauren Wilner, Emma Wells, Michael Ritter, Jean Marcel Casimir, Kenneth Chui and Daniele Lantagne

Research Paper
67 Removing Legionella pneumophila and biofilms from water supply systems using plant essential oils
Ozgur Ceylan and Bulent Turasay

Research Paper
74 Laboratory efficacy and field effectiveness of hollow fiber membrane microfilters used for household water treatment in Honduras
Anna L. Murray, Barbara Stewart, Catherine Hopper, Ellen Tobin, Jimmy Rivera, Henry Mut-Tracey, Patrick Stewart, Cordelia Stewart, Claire Tobin, Mario Goeb, Carolyn Meub and Daniele S. Lantagne
Research Paper
85 Trash removal methods for improved mechanical emptying of pit latrines using a screw auger
Tracey Sisco, Tate Rogers, Walt Beckwith, Willy Chipeta, Rochelle Holm, Christopher A. Buckley and Francis L. de los Reyes III

Research Paper
92 Assessing ambient and internal environmental conditions of pit latrines in urban slums of Kampala, Uganda: effect on performance
Anne Nakagiri, Charles B. Niwagaba, Philip M. Nyenje, Robinah K. Kulabako, John B. Tumuhairwe and Frank Kansiime

Research Paper
102 Isotherm models and kinetics of copper adsorption by using hydrochar produced from hydrothermal carbonization of faecal sludge
Thammarat Koottatep, Krailak Fakkaew, Nutnicha Tajai and Chongrak Polprasert

Research Paper
111 Urine diversion dry toilets in eThekwini Municipality, South Africa: acceptance, use and maintenance through users’ eyes
Nosipho Mkhize, Myra Taylor, Kai M. Udert, Teddy G. Gounden and Chris A. Buckley

Research Paper
121 Take it away: the need for designing fecal sludge disposal services for single-pit latrines
Soumya Balasubramanya, Barbara Evans, Rizwan Ahmed, Ahasan Habib, N. S. M. Asad, Mominur Rahman, Mahmudul Hasan, Digbijoy Dey, Miller Camargo-Valero, Krishna Chaitanya Rao and Sudarshana Fernando

Research Paper
129 What has poverty got to do with it? Analysis of household access to improved sanitation in Ghana
Simon Mariwah, Joshua Amo-Adjei and Prisca Anima

Research Paper
140 Water, sanitation and hygiene (WASH) in schools: results from a process evaluation of the National Sanitation Campaign in Tanzania
Prince Antwi-Agyei, Anyitike Mwakitalima, Amour Seleman, Filemoni Tenu, Theresia Kuwite, Stephen Kiberiti and Elisa Roma

Practical Paper
151 Characterization of pit latrines to support the design and selection of emptying tools in peri-urban Mzuzu, Malawi
Rashid Chiposa, Rochelle H. Holm, Chimuleke Munthali, Russel C. G. Chidya and Francis L. de los Reyes III

Practical Paper
156 Control of urine odor in different sanitation practices and its implication on water saving
Shervin Hashemi and Mooyoung Han
