Contents

183 Distributed urban storm water modeling within GIS integrating analytical probabilistic hydrologic models and remote sensing image analyses
Peter D. Luciani, James Y. Li and Douglas Banting

200 Disinfection by-products in drinking water – a case study on Calgary, Alberta, Canada
Mei Chen, Klas Ohman, Jason Sinclair, Darcy Petkau, Raymond Yau, Jian Fu Deng, Thien Tran, Chris Huston and Tom Elford

211 Colour removal and the effect of reactive dyes on acid producing anaerobic microorganisms
Debraj Bhattacharyya and Kripa S. Singh

219 Fish and ecosystem health as determined by parasite communities of lake whitefish (Coregonus clupeaformis) from Saskatchewan boreal lakes
Michael Pietrock and Olesya Hursky

230 Treatability study of two hybrid-passive treatment systems for landfill leachate operated at cold temperature
Sean Speer, Pascale Champagne and Bruce Anderson

239 Adsorption of nickel from aqueous solutions using low cost biowaste adsorbents
Harminder Singh and V. K. Rattan

250 Correlation and prediction of azo dye degradation by nonlinear least-square regression in combined ozonation and ultrasonolysis processes
Masroor Mohajerani, Mehrab Mehrvar and Farhad Ein-Mozaffari

259 Removal of Cu(II) ions from aqueous solution by micro-particles of dried Carpobrotus edulis plant in a column system
Mohamed Chiban and Fouad Sinan
