Contents

95 Evaluation of an in situ early life stage test with cutthroat trout, *Oncorhynchus clarki*, for environmental monitoring – a case study using mine effluent
B. Chalmers, J. Elphick, G. Gilron and H. Bailey

104 Decision support system to select sustainable point-of-use/point-of-entry treatment systems (D4SPOUTS)
Mohamed A. Hamouda, William B. Anderson and Peter M. Huck

114 Evaluation of the adenosine triphosphate (ATP) bioluminescence assay for monitoring effluent quality and disinfection performance
Natalie Linklater and Banu Örmeçi

124 Pollutant removal efficiency of a retrofitted stormwater detention pond
Jason Faber Carpenter, Bertrand Vallet, Geneviève Pelletier, Paul Lessard and Peter A. Vanrolleghem

135 Impact of salinity on coagulation and dissolved air flotation treatment for oil and gas produced water
Jessica M. Younker and Margaret E. Walsh

144 Modeling of hourly river water temperatures using artificial neural networks
Cindie Hebert, Daniel Caissie, Mysore G. Satish and Nassir El-Jabi

163 Removal of basic dyes from aqueous solutions by activated carbon derived from *Eichornia crassipes*: equilibrium and kinetic studies
Syed Usman Nasrin Banu and G. Maheswaran

179 Loading estimate methods to support integrated watershed-lake modelling: Duffins Creek, Lake Ontario
William G. Booty, Isaac Wong, Gary. S. Bowen, Phil Fong, Craig McCrnimmon and Luis Leon

192 Philip H. Jones Award

193 Corrigendum: Water Quality Research Journal of Canada 49(1), 82–93: Computational modelling techniques in the optimization of corrosion control for reducing lead in Canadian drinking water,
