Computational Fluid Dynamics in Water and Wastewater Processes

Contents

1 Editorial
   Ingmar Nopens, Domenico Santoro, Charles N. Haas and Peter Vanrolleghem

4 Computational fluid dynamics modeling alternatives for UV-initiated advanced oxidation processes
   Joel J. Ducoste and Scott M. Alpert

21 Computational modeling of UV photocatalytic reactors: model development, evaluation, and application
   J. Esteban Duran, Madjid Mohseni and Fariborz Taghipour

34 Quantifying ultraviolet inactivation kinetics in nearly opaque fluids
   Ferdinando Crapulli, Domenico Santoro, Michael R. Sasges, Shaunak Ray, Housyn Mahmoud and
   Ajay K. Ray

47 Experimental and numerical investigation of the breakage of wastewater flocs in orifice flow
   Aaron Fernandes, Yuri Lawryshyn, John Gibson and Ramin Farnood

58 Computational fluid dynamics simulation and parametric study of an open channel ultra-violet wastewater
   disinfection reactor
   Rajib Kumar Saha, Madhumita Ray and Chao Zhang

72 Optimization of water treatment plant flow distribution with CFD modeling of an influent channel
   Carrie Knatz, Stephen Rafferty and Anthony Delescinskis

83 Modeling of the hydrodynamics and energy expenditure of oxidation ditch aerated with hydrojets using
   CFD codes
   Anna M. Karpinska, Madalena M. Dias, Rui A. R. Boaventura and Ricardo J. Santos
