Contents

343 Editorial – L’avenir est prometteur. L’avenir est ouvert!
Peter A. Vanrolleghem, Arash Zamyadi and Rod Cookson

345 Removal of nickel through sulfide precipitation and characterization of electroplating wastewater sludge
Sarah Jerroumi, Mohammed Amarine, Hassan Nour, Brahim Lekhlif and Jamal Eddine Jamal

358 Treatment of highly turbid water in disaster conditions using coagulation-flocculation process: modeling and optimization
Danial Nayeri and Seyyed Alireza Mousavi

370 Study on immobilization of diatomite, Ca(H₂PO₄)₂, CaCO₃, HAP and nano-HAP for heavy metal contaminated sediment
Zhibin Zhang, Xianhui Shi, Yanhao Zhang, Shengrui Wang, Meng Wang, Yuchen Wang, W. M. Sumana Bandara Weerakoon and Olga Sanginova

382 Wastewater lagoon solids, phosphorus, and algae removal using discfiltration
Guillaume LeBlond, Patrick M. D’Aoust, Chris Kinsley and Robert Delatolla

394 Comparison of a deterministic and statistical approach for the prediction of thermal indices in regulated and unregulated river reaches: case study of the Fourchue River (Québec, Canada)
Laurie Beaupré, André St-Hilaire, Anik Daigle and Normand Bergeron
