Water Science and Technology: Water Supply

Volume 10, Number 5

Contents

679 Understanding drivers and barriers: the key to water use behaviour change
Michelle Graymore, Anne Wallis and Kevin O’Toole

689 Microbiological quality of bottled water brands sold in retail outlets in New Zealand
R. Svagzdīene, R. Lau and R. A. Page

700 Effect of advanced water treatment on behaviour of residual chlorine and development of chlorine control method in distribution systems
T. Fuchigami, M. Takeda and K. Terashima

710 Multivariate consumption profiling (MCP) for intelligent meter systems: a methodology to define categories and levels
J. L. Solanas and M. R. Cusso

721 Key decisions for sustainable utility energy management
Steve A. Conrad, Murray Hall, Stephen Cook and Jack Geisenhoff

730 Modeling formation and control of disinfection byproducts in chlorinated drinking waters
Edward McBean, Zoe Zhu and Wen Zeng

740 Analysis of flushing-path effects in water-distribution networks

746 Legionella pneumophila serogroup 3 prevalence in drinking water survey in Israel (2003–2007)
Rachel Yarom, Rivka Sheinman and Robert Armon

753 City drainage in ancient China
P. Du and X. Zheng

765 Evaluation of an emerging water treatment technology: ceramic membranes

771 Soil solutions: improving water management across Sydney’s public open spaces
Alisa Bryce and Andrew Porter

776 Rainwater harvesting: environmentally beneficial for the UK?
C. M. Way, D. B. Martinson, S. E. Heslop and R. S. Cooke

783 IntegTa: a procedure for integrative management of dammed raw water reservoirs for drinking water production and their lower reaches
I. Slavík, W. Uhl, J. Völker, H. Lohr, M. Funke, S. Rolinski and L. Paul
Challenges in addressing variability of lead in domestic plumbing

Michael R. Schock and France G. Lemieux

Optimization of direct-osmosis–high-salinity cleaning for reverse osmosis fouling control in water reuse

Jian-Jun Qin, Maung Htun Oo, Kiran A. Kekre and Harry Seah

Proficiency test of non-target screening with gas chromatography mass spectrometry to confirm a detected contamination of raw and drinking water

Michael Petri, Jia-Qian Jiang and Matthias Maier

Structural equation modeling for assessing the sustainability of rural water supply systems

A. Masduqi, N. Endah, E. S. Soedjono and W. Hadi

Measuring sustainability of water supply: performance indicators and their application in a corporate responsibility report

N. Staben, A. Hein and T. Kluge

Estimation of the virtual water trade between two Spanish regions: Castilla-la Mancha and Murcia

Ángel De Miguel, Eloy García and Irene De Buestamante

Investigation of the use of TiO$_2$ doped with metal ions in water disinfection

M. A. Khraisheh, L. Wu and B. Antizar-Ladislao

Sludge characterization at Kadahokwa water treatment plant, Rwanda

A. Uwimana, I. Nhapi, U. G. Wali, Z. Hoko and J. Kashaigili

“Ozone” and “GAC filtration” synergy for removal of emerging micropollutants in a drinking water treatment plant?

C. Boucherie, C. Lecarpentier, N. Fauchon, M. Djafer and V. Heim

Photoelectrocatalytic activity for water treatment of TiO$_2$/Ti electrodes prepared by anodization

A. Attyaou, A. Ben Youssef and L. Boussemel
