Water Science and Technology: Water Supply

Volume 11, Number 4

Contents

379 From international developments to local practice: Germany’s evaluation and dialogue process towards Water Safety Plan implementation
Oliver Schmoll, Claudia Castell-Exner and Ingrid Chorus

388 A survey of ancient Minoan water technologies
Yuri Gorokhovich, Larry Mays and Lee Ullmann

400 Deterioration in water quality from supply chain to household and appropriate storage in the context of intermittent water supplies
Daniel Elala, Pawan Labhasetwar and Sean F. Tyrrel

409 Joint water supply projects in rural Cameroon: partnership or profiteering? Lessons from the Mautu–Cameroon Development Corporation (CDC) project
Fidelis Folifac and Susan Gaskin

418 Rapid, specific and quantitative polymerase chain reaction (PCR) detection of pathogenic protozoa Entamoeba histolytica for drinking water supply
S. W. Lam, H. B. Zhang, L. Yu, C. H. Woo, K. N. Tiew and Z. G. Yang

426 Microbial community structure of a slow sand filter schmutzdecke: a phylogenetic snapshot based on rRNA sequence analysis

437 Reliability assessment of water distribution systems with statistical entropy and other surrogate measures
Tiku T. Tanyimboh, Marika T. Tietavainen and Saleh Saleh

444 Practical application of the head dependent gradient method for water distribution networks
Calvin Siew and Tiku T. Tanyimboh

451 Risk analysis of rich–poor rainfall encounter in inter-basin water transfer projects based on Bayesian networks
Kang Ling and He Xiaocong

460 Prediction of advanced oxidation performance in UV/H₂O₂ reactor systems with LP-UV lamps

468 Biological aspects of slow sand filtration: past, present and future
S. J. Haig, G. Collins, R. L. Davies, C. C. Dorea and C. Quince

473 Influence of organic fouling and operating conditions on nanofiltration membranes to reduce phenol concentration in natural waters
N. García-Vaquero Marín and J. A. López-Ramírez

481 Predictability of fouling-potential of raw water for ultrafiltration membranes
S. Krause and A. Obermayer

IWA Publishing
Monitoring, environmental emergencies management and water treatment improvement of freshwater lakes in China: the Chao Lake case study

V. Mezzanotte, M. Bresciani, S. Canobbio, C. Giardino, M. Antonelli, A. Bortoluzzi, F. Foltran, A. Panizza, A. Pietrosanti, Y. M. Ren, L. De Biase and C. Nurizzo

A GIS-based water distribution model for Zhengzhou city, China

Hou Yu-Kun, Zhao Chun-Hui and Huang Yu-Chung
