Water Science and Technology: Water Supply

Volume 12, Number 6

Contents

715 Investigating the performance of a UV/H2O2 integrated flow-through system followed by free chlorine
Xiaona Chu, Jiangyong Hu and Yang Xu

720 Biofilms and bacteriological water quality in a domestic installation model simulating daily drinking water consumption
Z. G. Tsvetanova and D. N. Dimitrov

727 Towards a new drinking water resource classification approach at a river basin scale
S. Piel, E. Baurès, S. Masclet, J. Perot and O. Thomas

737 Sustainable water resources management in the Long Bien district of Hanoi, Vietnam
C. Stefan, T. Fröhlich, L. Fuchs, R. Junghanns, H. M. Phan, V. N. Tran and P. Werner

747 Delivering an essential and sustainable water plan for Sydney, Australia
Colin Nicholson

755 Pharmaceutical removal during managed aquifer recharge with pretreatment by advanced oxidation

768 Energy and environmental costs related to water supply in Mexico City
R. Salazar, A. Rojano and I. López

773 Toxic metal ions in water and their prevalence in Uttarakhand, India
Vinod Kumar Gupta, Rajendra Dobhal, Arunima Nayak, Shilpi Agarwal, Devi Prasad Uniyal, Prashant Singh, Bhavtosh Sharma, Shweta Tyagi and Rakesh Singh

783 Riverbank filtration in India – using ecosystem services to safeguard human health
C. Sandhu and T. Grischek

791 Elution of bisphenol A and its chlorination by-products from lined pipes in water supply process

799 The water governance challenge: the discrepancy between what is and what should be
H. M. Ravnborg and K. M. Jensen

810 Degradation of surfactant SLS in water by singlet oxygen generated by the reaction between hydrogen peroxide and hypochlorite
Luiz Alberto Cesar Teixeira, Mariana de Faria Gardingo, Lidia Yokoyama and Fabiana Valeria da Fonseca Araujo

818 A construction of water quality index considering physicochemical properties for drinking purposes in a rural settlement: a case study of Gajraula region, Ganga River Basin (North India)
Bineet Singh, Jaspal Singh Chauhan and Anuraag Mohan

IWA Publishing
829 Genotoxicity and effects of nanosilver contamination in drinking water disinfection
Slaven Dobrović, Hrvoje Juretić, Davor Ljubas, Ivana Vinković Vrček, Maja Zebić Avdićević, Mirta Milić, Nevenka Kopjar and Ina Nemet

837 Impacts of pH-dependent metal speciation on the decomposition of triclosan by sulfate radicals
Prince Nfodzo, Qinhong Hu and Hyeok Choi

844 Applying multi-criteria decision analysis to select WSUD and LID technologies
Faisal Ahammed, Guna Alankarage Hewa and John R. Argue

854 The sustainability performance of the water and sanitation services in Santiago de Chile
Laura Margarete Simon and Helmut Lehn

862 Synergistic electric field enhancement of the effectiveness of chlorine species formed during electrochemical disinfection of drinking water
Hilary Nath and Alan Langdon

869 Removal of DOM and THM formation potential of tropical surface water by ceramic microfiltration
A. Abeynayaka, C. Visvanathan, N. Monthakanti, T. Hashimoto and H. Katayama

878 Applicability of ion exchange for NOM removal from a sulfate-rich surface water incorporating full reuse of the brine
L. Verdickt, W. Closset, V. D’Haeseleer and J. Cromphout

895 A practical decision scheme for the prioritization of water pipe replacement
Y. Tlili and A. Nafi

918 Development of automatic coagulant dosage control technology for rapid change of raw water quality parameters
Y. Sangu, H. Yokoi, H. Tadokoro and T. Tachi

926 Water reuse in the Kingdom of Saudi Arabia – status, prospects and research needs
Jörg E. Drewes, C. Patricio Roa Garduño and Gary L. Amy

937 Effectiveness of reconstruction of water supply system from the economic viewpoint and affecting factors – case study of a city
Hayato Nakazono, Okinari Dodo and Kinya Kataishi
