Water Science and Technology

Volume 13, Number 4

Contents

871 Editorial
Marco Franchini and Bruno Brunone

875 A new algorithm for real time pressure control in water distribution networks
E. Creaco and M. Franchini

884 Bayesian modelling for water loss management decisions
C. Gavrila, N. Teodorescu and I. Gruia

890 From energy balance to energy efficiency indicators including water losses
C. Lenzi, C. Bragalli, A. Bolognesi and S. Artina

897 Frequency pressure regulation in water supply systems
Ivan Halkiевич, Zivko Vukovic and Drazen Vouk

908 Applications of discriminative flow pattern analysis using the CFPD method
Peter van Thienen, Ilse Pieterse-Quirijns, Jan Vreeburg, Karel Vangeel and Zoran Kapelan

917 A mathematical model to evaluate apparent losses due to meter under-registration in intermittent water distribution networks
M. De Marchis, C. M. Fontanazza, G. Freni, G. La Loggia, V. Notaro and V. Puleo

927 Development of a sealing material and robot for automatic socket rehabilitation of grey cast iron pipes in drinking water supply systems

935 Regulation of water service and efficient use of water
R. Drusiani, M. Gatta and G. G. Gerelli

943 Assessing the performance of urban water networks across the EU Mediterranean area: The paradox of high NRW levels and absence of respective reduction measures
V. Kanakoudis, S. Tsitsiflis, P. Samaras and A. Zouboulis

955 Water network sectorization based on a genetic algorithm and minimum dissipated power paths

962 Diagnosis of pipe systems by the SLE: first results
Christian Massari, T.-C. Jim Yeh, Marco Ferrante, Bruno Brunone and Silvia Meniconi

971 An electromagnetic-based method for pinpointing leaks in buried pipes: a practical validation
A. Cataldo, G. Cannazza, E. De Benedetto, M. Miraglia, D. Ancora and N. Giaquinto

982 Generation of synthetic cross-correlated water demand time series
N. Ansaloni, S. Alvisi and M. Franchini

992 Leak behaviour in pressurized PVC pipes
M. Ferrante, C. Massari, B. Brunone and S. Meniconi
Domestic well database development and integration into a GIS: an approach for managing ground water resources
Meredith J. Metcalf and Gary A. Robbins

Study of oyster shell as a potential substrate for constructed wetlands
Zhen Wang, Jian Dong, Lin Liu, Gefu Zhu and Chaoxiang Liu

Aggregation and biofilm formation of bacteria isolated from domestic drinking water
B. Ramalingam, R. Sekar, J. B. Boxall and C. A. Biggs

A comparative study of three different assimilable organic carbon (AOC) methods: results of a round-robin test

Bacteriological water quality compliance and root cause analysis: an industry case study
Kate Ellis, Bernadette Ryan, Michael R. Templeton and Catherine A. Biggs

Artificial destratification of Dipotamios reservoir in Northern Greece by low energy air injection
Manassis Mitrakas, Petros Samaras, Stelios Stylianou, Chris Kakalis and Anastasios Zouboulis

Assessment of correlation between physiological states of Escherichia coli cells and their susceptibility to chlorine using flow cytometry
Saeid Rezaeinejad and Volodymyr Ivanov

Water distribution networks simulation by optimization approaches
M. Soltanjalili, O. Bozorg Haddad, S. Seifollahi Aghmiuni and M. A. Mariño

Improved risk assessment and risk reduction strategies in the Water Safety Plan (WSP) of Salta, Argentina
L. Seghezzo, M. L. Gatto D’Andrea, M. A. Iribarnegaray, V. I. Liberal, A. Feitas and J. L. Bonifacio

Wider presence of accelerated chemical chloramine decay in severely nitrifying conditions
K. C. Bal Krishna, Arumugam Sathasivan and Scott Garbin

Removal of natural organic matter and trihalomethane formation potential in a full-scale drinking water treatment plant
Ekaterina Vasyukova, René Proft, Johanna Jousen, Irene Slavik and Wolfgang Uhl

Arsenic removal using novel combined Fe/Mn adsorbent modified with silica
Duc Canh Nguyen, Hyun Ju Park, Seok Dockko and Moo Young Han

Methodology for sampling drinking water discolouration loose deposits at low-velocities
Ana Poças, Nazaré Rebola, Bruno Cordeiro, Sérgio Rodrigues, Maria J. Benoliel, Jan Vreeburg and José Menai

Factors affecting formation of haloacetonitriles and haloketones during chlorination/monochloramination of Jinlan Reservoir water
Huachang Hong, Fangqu Huang, Hongjun Lin, Haiying Yu, Fangyuan Wang and Linxian Ding

Biological ammonia removal field studies for drinking water treatment
D. Laky and Sz. Takó

Qualitative analysis and classification of surface water in Bukit Merah Reservoir in Malaysia
Christopher O. Akinbile, Mohd Suffian Yusoff, Siti Hidayah Abu Talib, Zorkeflee Abu Hasan, Wan Roslan Ismail and Ummunajwa Sansudin

A new deterministic method for groundwater mapping using a digital elevation model
Tamás Ács and Zoltán Simonffy

Shared failure data for strategic asset management
J. H. G. Vreeburg, I. N. Vloerbergh, P. van Thienen and R. de Bont

Assessment of water quality modelling capabilities of EPANET multiple species and pressure dependent extension models
Alemtsehay G. Seyoum, Tiku T. Tanyimboh and Calvin Siew

Evaluation of trihalomethane formation in treatment of water containing Microcystis aeruginosa using chitosan as coagulant
B. C. Capelete and C. C. S. Brandão

Development of point-of-use water disinfection technology using ceramic water filter and electrochemical hybrid system
