Water Science and Technology: Water Supply

Volume 13, Number 5

Contents

1181 Silver nanoparticle removal from drinking water: flocculation/sedimentation or filtration?
Desmond F. Lawler, Anne M. Mikelenos, Ijung Kim, Boris L. T. Lau and Sungmin Youn

1188 Managing long-term capacity in the age of conservation
Frank Qiao, Z. Michael Wang and Jim McCarthy

1195 Application of linear programming for looped water supply pipe network design
A. K. Sharma and P. K. Swamee

1202 The influence of antecedent soil moisture conditions on the rainfall-runoff threshold value of a roaded catchment used for water harvesting
C. W. Baek and N. Coles

1209 Turbidity as a surrogate for Cryptosporidium removal by filtration in drinking-water QMRA models

1220 Characterization of hydraulically reversible and irreversible fouling species in ultrafiltration drinking water treatment systems using fluorescence EEM and LC–OCD measurements
R. H. Peiris, M. Jaklewicz, H. Budman, R. L. Legge and C. Moresoli

1228 Recent trends in microorganism-related off-flavor problems in drinking water treatment systems in Japan
Naohiro Kishida, Yoshiaki Konno, Kentaro Nemoto, Taisuke Amitani, Akihito Maki, Naoshi Fujimoto and Michihiro Akiba

1236 Synthesis of a novel tannin–formaldehyde resin from Acacia nilotica fruit extract and its viability for adsorption of manganese from ground water
Mahmoud M. Kamel, Amr M. Abd El-Mgeed and Mahmoud A. I. El-Hewaihy

1249 Public–private partnership in the water sector in Romania: success or failure?
F. Iliescu, S. Popescu, M. Dragomir and D. Dragomir

1257 An improved method for determining HNMs in drinking water
F. Q. Huang, M. Y. Ruan, J. D. Yan, H. C. Hong, H. J. Lin and Y. J. Xiong

1265 Water distribution network optimization using maximum entropy under multiple loading patterns
Anna M. Czajkowska and Tiku T. Tanyimboh

1272 Integrated watershed management efforts: case study from Melen Watershed experiencing interbasin water transfer

1281 Hydraulic performance of post-earthquake water distribution networks based on head driven simulation method
A. Mani, M. Tabesh and M. R. Zolfaghari
Removal characterization of $^{133}$Cs and $^{127}$I in a water treatment process using a lab-scale experiment
Hee Suk Lee, Jeongyup Lee, Byengsuk Yoon, Youjin Yim, Ilhwan Choi, Hyukjin Cho, Songhee Lee, Kyounghee Baik, Ju Hyeon Park and Yu Jeong Huh

Neutrophilic iron-oxidizing bacteria: occurrence and relevance in biological drinking water treatment
A. Gülay, S. Musovic, H.-J. Albrechtsen and B. F. Smets

Identification of treatment by-products of the ozonation of estrone sulfate

Granulation of Fe-Al-Ce nano-adsorbent for fluoride removal from drinking water using inorganic binder
Chao-Li Su, Lin Chen, Ting-Jie Wang, Li-Xin Yu and Yong Jin

Modeling role of rice paddy field and its implication in water management
Hyunju Park, Tschungil Kim, Hyunwoo Kim and Mooyoung Han

Proposal of a systematic methodology to estimate apparent losses due to water meter inaccuracies
F. J. Arregui, J. Soriano, J. García-Serra and R. Cobacho

The use of process simulation models in virtual commissioning of process automation software in drinking water treatment plants

Integration of on-line and off-line methodologies for the assessment of river water quality
R. Lopez-Roldan, S. Gonzalez, S. Pelayo, B. Piña, S. Platikanov, R. Tauler, A. de la Cal, M. R. Boleda and J. L. Cortina

The impact of alum coagulation on pharmaceutically active compounds, endocrine disrupting compounds and natural organic matter
Sabrina Diemert and Robert C. Andrews

Analysis of Water Safety Plan costs from case studies in the Western Pacific Region
Zai Kang Chang, Mien Ling Chong and Jamie Bartram

Comparison of deterministic and heuristic optimization solvers for water network scheduling problems
J. G. Bene, I. Selek and Cs. Hős

A case study on the career paths of Finnish water supply and sanitation service experts
A. J. Takala

Comparison between Rapid ID 32 Strep System, Matrix Assisted Laser Desorption Ionisation–Time of Flight Mass Spectrometry and 16S rRNA gene sequence analysis for the species identification of Enterococcus spp. isolated from water
Maja Taučer-Kapteijn, Gertjan Medema and Wim Hoogenboezem

Groundwater trading in Australia
S. J. Lawson and P. B. Kumar

Effect of dead cells on biofouling in the reverse osmosis process
Myung Seop Shin, Lan Hee Kim, Sung-Jo Kim, Chang-Min Kim, Kyu-Jung Chae and In S. Kim

Remote sensing of cyanobacterial blooms in Lake Champlain, USA
Adam Trescott, Elizabeth Isenstein and Mi-Hyun Park

The contribution of a spring water source to the water needs of the botanical garden of the University of Coimbra
H. Simão, J. A. Sá Marques and H. Freitas
