Water Science and Technology: Water Supply

Volume 14, Number 1

Contents

1 Perspectives on drinking water monitoring for small scale water systems
   Benoit Roig, Estelle Baures and Olivier Thomas

13 Towards sustainable sanitation – the HAMBURG WATER Cycle in the settlement Jenfelder Au
   Kim Augustin, Anne-Katrin Skambraks, Zhiqiang Li, Thomas Giese, Ulf Rakelmann, Franziska Meinzinger, Henning Schonlau and Christian Günner

22 Fluorescence characteristics of natural organic matter in water under sequential exposure to UV irradiation/chlor(am)ination
   Qianjun Guo, Zaili Zhang, Zhengbo Ma, Yongmei Liang and Wei Liu

31 Rapid inactivation of Salmonella by a quaternized biopolymeric flocculant
   Gurpreet Kaur Khaira, Abhijit Ganguli and Moushumi Ghosh

38 Use of cisterns during antiquity in the Mediterranean region for water resources sustainability
   Larry W. Mays

48 Life cycle analysis of two Hungarian drinking water arsenic removal technologies
   C. J. Jones, D. Laky, I. Galambos, C. Avendano and V. L. Colvin

61 Technical inefficiency effects in a stochastic production function for managerial incentives in public water utilities
   Silver Mugisha

73 Use of PCA-RBF model for prediction of chlorophyll-a in Yuqiao Reservoir in the Haihe River Basin, China
   Liu Xiaobo, Dong Fei, He Guojian and Liu Jingling

81 Modelling both the continual erosion and regeneration of discolouration material in drinking water distribution systems

91 Microbiological performance of novel household water treatment devices in India
   Z. P. Bhatthena, S. Shrivastava, Poonam Londhe and Joe Brown

99 Antagonism between clinical and environmental isolates of Pseudomonas aeruginosa against coliforms
   Vinicius Vicente Martins, Ana Carolina Macarenco, Débora Galves Gradella and Eliana Guedes Stehling

107 A novel acoustic imaging tool for monitoring the state of rapid sand filters
   Nihed Allouche, Dick G. Simons, Paul Keijzer, Luuk C. Rietveld and Joost Kappelhof

119 Hand-pump subsurface arsenic removal: the effect of groundwater conditions and intermittent operation
127 Evaluating groundwater sustainability for fractured crystalline bedrock  
Meredith J. Metcalf and Gary A. Robbins

135 A comparative study of greywater from domestic and public buildings  
C. Santos, C. Matos and F. Taveira-Pinto

142 Formation characteristics of haloacetic acids from phenols in drinking water chlorination  
Fei Ge, Fei Tang, Yin Xu and Yao Xiao

150 Disinfection performance of nanosilver and impacts of environmental conditions on viral inactivation by nanosilver  
Yang Xu, Xiaona Chu, Jiangyong Hu and Say Leong Ong

158 Comparing electrochemical disinfection with chlorination for inactivation of bacterial spores in drinking water  
L. Mezule, M. Reimanis, V. Krumplevska, J. Ozolins and T. Juhna

165 Removal of DOM and AOC in a full-scale advanced water treatment plant: effects of operational periods of BAC filters  
J. Lohwacharin, Y. Yang, N. Watanabe, A. Phetrak and S. Takizawa

173 Integrated Water Resources Management for meso-scale ungauged river basins in Russia  
T. Terekhanova, O. Berezina, J. Tränckner, S. Dvinskii and P. Krebs
