Water Science and Technology: Water Supply

Volume 15, Number 5

Contents

889 Water–energy–carbon nexus: a case study of Bangkok
Sangam Shrestha, Kshitij Parajuli, Mukand S. Babel, Shobhakar Dhakal and Victor Shinde

898 A review of sensor placement objective metrics for contamination detection in water distribution networks
Shweta Rathi, Rajesh Gupta and Lindell Ormsbee

918 Effects of raw diatomite on coagulation performance and residual aluminum during the micropolluted raw water treatment with polyaluminum chloride
W. C. Hu, C. D. Wu and L. G. Liu

924 Soil water movement under a drip irrigation double-point source
Lizhu Hou, Jie Shang, Jiangtao Liu, Haiyuan Lu and Zhiming Qi

933 The need for Virtual Water Credits and Trading System
S. Ravi Shankar and A. S. V. Jayasri

940 Assessment of water ecological carrying capacity using an indicator-based method applied to Tieling City, China
J. F. Yang, K. Lei, S. T. Khu, F. Qiao and Q. Liu

948 Simulation of sugarcane yield under salinity and water stress conditions with the OPDM model
Sahar Palangi and Omid Bahmani

958 Adaptable urban water demand prediction system
G. Banjac, M. Vašak and M. Baotic

965 Modifications for water management guidance based on an assessment of swimming pool water consumption of an operational facility in the UK
Lowell Lewis, John Chew, Iain Woodley, Jeni Colbourne and Katherine Pond

974 Tackling rainwater shortages during dry seasons using a socio-technical operational strategy
Tulinave B. Mwamila, Mooyoung Y. Han, Tschung-il Kim and Preksedis M. Ndomba

981 Arsenic removal from groundwater by ion exchange and adsorption processes: comparison of two different materials
Agostina Chiavola, Emilio D’Amato, Renato Gavasci and Piero Sirini

990 Distribution of iron in activated carbon composites: assessment of arsenic removal behavior
Trishikki Raychoudhury, Ferry Schiperski and Traugott Scheytt

999 Surface modification of reverse osmosis membranes with zwitterionic polymer to reduce biofouling
Ahmed E. Abdelhamid, Mahmoud M. Elawady, Mahmoud Ahmed Abd El-Ghaffar, Abdelgawad M. Rabie, Poul Larsen and Morten Lykkegaard Christensen
Topological clustering as a tool for planning water quality monitoring in water distribution networks
Jonas Kjeld Kirstein, Hans-Jørgen Albrechtsen and Martin Rygaard

How do typhoons and dust storms affect rainwater harvesting systems?
Nick D. Wang and Jhy-Chern Liu

Optimization and economic analysis for a small scale nanofiltration and reverse osmosis water desalination system
Manoj Chandra Garg and Himanshu Joshi

Using ozonation to eliminate the inhibition of soluble algal products (SAP) of Scenedesmus sp. LX1 on its growth in microalgal cultivation for biomass/bioenergy production
Lin-Lan Zhuang, Yin-Hu Wu, Xiao-Jie Shi, Tian-Yuan Zhang and Hong-Ying Hu

Biodegradation of multiple nitrosamines by the Bacillus species LT1C in drinking water biofilters
Wanfeng Wang, Yanling Guo, Yao Huang, Chunyou Zhu, Jing Fan and Feng Pan

The optimization of the paddy field irrigation scheduling using mathematical programming
Siamak Kheybari and Reza Salehpour

A new method for efficient detection of Cryptosporidium RNA by real-time reverse transcription-PCR with surfactants
Takahiro Sekikawa and Kosuke Toshiki

The joint effect of water price changes and pressure management, at the economic annual real losses level, on the system input volume of a water distribution system
Vasilis Kanakoudis and Konstantinos Gonelas

Development of artificial neural networks based confidence intervals and response surfaces for the optimization of coagulation performance
Robert H. McArthur and Robert C. Andrews

Effective production of rapid filters with polystyrene granules as a media filter
Juliana M. Schöntag and Mauricio L. Sens

Efficient photo-oxidation of phenol and photo-inactivation of bacteria by cationic tetrakis(trimethylanilinium)porphyrins
Fatemeh Fayyaz, Rahmatollah Rahimi, Mehdi Rassa and Ali Maleki

Water safety plans at EPAL’s water supply system-tool to prioritize investments and mitigation actions
R. N. Carneiro, S. Damião and M. J. Benoliel

A visual tool to calculate optimal control strategy for non-identical pumps working in parallel, taking motor and VSD efficiencies into account
Markus I. Sunela and Raido Puust

Technical coefficients of direct use of water in monetary terms for agriculture and urban water use
M. M. G. A. de Moraes, A. C. G. Carneiro, M. P. R. da Silva and G. F. Marques

Concentrate of surfactant-based draw solutions in forward osmosis by ultrafiltration and nanofiltration
Hau Thi Nguyen, Nguyen Cong Nguyen, Shiao-Shing Chen and Shu-Ying Wu

Watermills in the historic irrigation system ‘Palmeral de Elche’, Spain: an example of early hydropower exploitation
Ignacio Melendez-Pastor, Jose Navarro Pedreño and Hartmut Wittenberg

Simultaneous determination of trace lead and cadmium in water samples by adsorptive stripping voltammetry using gallic acid as a selective chelating agent
Shahryar Abbasi, Masoumeh Rostamniya and Hossein Khani
