Aims and Scope

WST: Water Supply, is a peer-reviewed journal, publishing the best papers submitted on all aspects of water supply. Subjects covered include:

- Management of water resources (including reservoirs),
- Water treatment technologies, including wastewater reuse and recycling,
- Water distribution systems,
- Drinking water quality,
- Water pollutants, characteristics and effects
- Water utility management including economic and social aspects.
- Climate change effects on water
- Norms and standards

WST: Water Supply has a special mission to serve as a bridge between the many IWA specialist groups and between science, engineering applications and management aspects of water supply. Papers describing progress in full scale implementations are particularly encouraged.
