

Water Science and Technology: Water Supply

Volume 16, Number 6

Contents

- 1477 Potential soil characteristics for riverbank filtration using 2-D ground resistivity in Kota Lama Kiri, Kuala Kangsar
Mohd Firdaus Abdul Razak, Md Azlin Md Said, Rais Yusoh and Rosmyra Jasmi
- 1484 Comparison of different targeting methods for watershed management practices implementation in Taleghan dam watershed, Iran
Hamzeh Noor, Mehdi Vafakhah and Majid Mohammady
- 1497 Surface energy balance algorithm for land-based consumption water use of different land use-cover types in arid-semiarid regions
Shereif H. Mahmoud and A. A. Alazba
- 1514 Microbial contamination and environmental factors of drinking water source for households with children under five years old in two South China ethnic groups
Wen Fang Long, Spencer Lloyd, Fan Zhang, Qiao Li, HaiRong Huang and Cong Yi
- 1519 An integrated system dynamics – cellular automata model for distributed water-infrastructure planning
Evangelos Rozos, David Butler and Christos Makropoulos
- 1528 Application of machine learning techniques to predict anomalies in water supply networks
D. Vries, B. van den Akker, E. Vonk, W. de Jong and J. van Summeren
- 1536 GIS based graphical user interface for irrigation management
Saroj Acharya, Ashish Pandey, S. K. Mishra and U. C. Chaube
- 1552 An alternative method to improve the settleability of gas-vacuolated cyanobacteria by collapsing gas vesicles
Helayaye Damitha Lakmali Abeynayaka, Takashi Asaeda, Kyoko Tanaka, Kimie Atsuzawa, Yasuko Kaneko, Hidenori Nishida and Seiichi Inada
- 1561 Evaluation of water resources comprehensive utilization efficiency in the Yellow River Basin
Xin-jian Guan, Sheng-xing Liang and Yu Meng
- 1571 Application of recycled sludge to stabilize coagulation process
Jolanta Gumińska and Adam Gumiński
- 1580 A systematic review of outcomes and lessons learned from general, rural, and country-specific Water Safety Plan implementations
Gabrielle String and Daniele Lantagne
- 1595 Mixing at double-Tee junctions with unequal pipe sizes in water distribution systems
Tingchao Yu, Hongying Qiu, Jeffrey Yang, Yu Shao and Liang Tao
- 1603 Removal of trace As(V) from aqueous solution by Fe(III)-loaded porous amidoximated polyacrylonitrile
Chunnuan Ji, Rongjun Qu, Qinghua Tang, Xiguang Liu, Hou Chen, Changmei Sun and Peng Yin

- 1614 Stochastic modelling of the hydraulic performance of an onsite rainwater harvesting system in Mediterranean climate
H. Muklada, Y. Gilboa and E. Friedler
- 1624 Evolution of rainwater harvesting and use in Crete, Hellas, through the millennia
A. N. Angelakis
- 1639 Estimating the ratio of pond size to irrigated soybean land in Mississippi: a case study
Ying Ouyang, Gary Feng, John J. Read, Theodor D. Leininger and Johnie N. Jenkins
- 1648 Control of disinfection byproduct (DBP) precursors by soil aquifer treatment (SAT): what length of hydraulic retention time (HRT) is necessary?
Songkeart Phattarapattamawong, Yugo Takabe, Shinya Echigo and Sadahiko Itoh
- 1659 A case study of the conversion of grey water to a flush water source in a Turkish student residence hall
E. Giresunlu and B. Beler Baykal
- 1668 Microbiological water quality of the Nišava River
D. I. Čučak, N. V. Marković and D. V. Radnović
- 1674 Quantitative real-time PCR does not reliably detect single fecal indicator bacteria in drinking water
Tamara Krapf, Roger Michael Kuhn, Peter Kauf, Corinne Helene Gantenbein-Demarchi and Lars Fieseler
- 1683 Impact of operational parameters on biofiltration performance: organic carbon removal and effluent turbidity
Vivek A. Nemani, Lizbeth Taylor-Edmonds, Nicolas M. Peleato and Robert C. Andrews
- 1693 Testing monolithic activated carbon adsorbers for in-line removal of organic micropollutants
Inga Hilbrandt, Aki Sebastian Ruhl and Martin Jekel
- 1700 Influence of Jordanian zeolite on the performance of a solar still: experiments and CFD simulation studies
Yazan Taamneh
- 1710 Bacteriological water quality changes in parallel pilot distribution systems
R. Fabris, K. Braun, L. Ho, J. Q. J. C. Verberk and M. Drikas
- 1721 Willingness to pay for the water supply service in Cape Verde – how far can it go?
Rui Marques, Pedro Carvalho, João Pires and Ana Fontainhas
- 1735 Disinfection effect of pressurized carbon dioxide on *Escherichia coli* and *Enterococcus* sp. in seawater
Thanh-Loc Thi Dang, Tsuyoshi Imai, Tuan Van Le, Huy Thanh Vo, Takaya Higuchi, Koichi Yamamoto, Ariyo Kanno and Masahiko Sekine
- 1745 Ultrasonic treatment for quantification of bioavailable phosphorus in soils and suspended sediments
Nguyen Minh Ngoc, Takanobu Inoue and Kuriko Yokota
- 1753 A stochastic model for daily residential water demand
Rudy Gargano, Carla Tricarico, Giuseppe del Giudice and Francesco Granata
- 1768 Interpreting unique colloidal response of TiO₂ nanomaterials to controlled sonication for understanding of their assembly configuration in water
Siyang Wu and Hyeok Choi
- 1776 Correlation analysis and threshold value research on the form and function indexes of an urban interconnected river system network
Ming Dou, Lu Yu, Meng Jin and Yan Zhang
