

# Water Science and Technology: Water Supply

Volume 17, Number 1

## Contents

- 1 In-situ biological denitrification using pretreated maize stalks as carbon source for nitrate-contaminated groundwater remediation  
**Tongyan Li, Wenqi Li, Chuanping Feng and Weiwu Hu**
- 10 Evaluation of iron-coated ZSM-5 zeolite for removal of As(III) from aqueous solutions in batch and column systems  
**Saeid Ezati, Bubak Souri and Afshin Maleki**
- 24 Anisotropic flow resistance theory and experimental verification on partially submerged crop vegetation  
**Shengtang Zhang, Yin Liu, Jingzhou Zhang and Yuanchen Liu**
- 32 Facile synthesis of chitosan nanoparticle-modified MnO<sub>2</sub> nanoflakes for ultrafast adsorption of Pb(II) from aqueous solution  
**Tianli Han, Xiaoman Zhang, Xiangqian Fu and Jinyun Liu**
- 39 General methodology for using Epanet as an optimization element in evolutionary algorithms in a grid computing environment for water distribution network design  
**Erika Yesenia Avila-Melgar, Marco Antonio Cruz-Chávez and Beatriz Martinez-Bahena**
- 52 Estuary salinity prediction using a coupled GA-SVM model: a case study of the Min River Estuary, China  
**Yihui Fang, Xingwei Chen and Nian-Sheng Cheng**
- 61 Linkages with the quantitative assessment of water resources vulnerability: a new approach for adaptive water management under a changing environment  
**J. Xia, W. Shi, S. Hong and J.-X. Chen**
- 73 A real-time, rapid emergency control model for sudden water pollution accidents in long-distance water transfer projects  
**Guobin Xu, Yan Long and Chao Ma**
- 84 Oxidative transformation of oxcarbapazine by Cl<sub>2</sub>, ClO<sub>2</sub> and O<sub>3</sub>: characteristics and pathways  
**H. F. Miao, H. H. Han, X. P. Ji, M. F. Lu, Z. X. Huang and W. Q. Ruan**
- 95 Coating techniques for glass beads as filter media for removal of manganese from water  
**Peter Rose, Simon Hager, Karl Glas, Dirk Rehmann and Thomas Hofmann**
- 107 Iron based sustainable greener technologies to treat cyanobacteria and microcystin-LR in water  
**Virender K. Sharma, Long Chen, Blahoslav Marsalek, Radek Zboril, Kevin E. O'Shea and Dionysios D. Dionysiou**
- 115 Aluminum–cerium double-metal impregnated activated carbon: a novel composite for fluoride removal from aqueous solution  
**Shreeya Kalidindi, Mounica Vecha, Arkamitra Kar and Trishikhi Raychoudhury**
- 125 Low cost and sustainable surface water purification methods using *Moringa* seeds and scallop powder followed by bio-sand filtration  
**Sharmin Zaman, Anowara Begum, K. S. Rabbani and Latiful Bari**

- 138 Drought class transition analysis through different models: a case study in North China  
**Ting Zhang, Jianzhu Li, Rong Hu, Yixuan Wang and Ping Feng**
- 151 Inactivation of particle-associated *Escherichia coli* with chlorine dioxide  
**Tao Lin, Bingwei Hou, Zhe Wang and Wei Chen**
- 161 A new immunomagnetic bead separation–surfactant extraction treatment protocol for rapid and sensitive quantitative PCR detection of *Cryptosporidium parvum* DNA  
**Takahiro Sekikawa**
- 169 Multiplex PCR for detection of water-borne bacteria  
**Roohollah Kheiri, Reza Ranjbar, Mojtaba Memariani and Leili Akhtari**
- 176 Preparation and application of magnetite nanoparticles immobilized on cellulose acetate nanofibers for lead removal from polluted water  
**Thanaa I. Shalaby, Marwa F. El-Kady, Abd El Halem M. Zaki and Soheir M. El-Kholy**
- 188 Identification of groundwater pollution sources based on a modified plume comparison method  
**Wenlong Gu, Wenxi Lu, Ying Zhao, Qi OuYang and Chuanning Xiao**
- 198 Advancing household water-use feedback to inform customer behaviour for sustainable urban water  
**Ariane Liu, Damien Giurco and Pierre Mukheibir**
- 206 Radon levels in different types of bottled drinking water and carbonated drinks in Iraqi markets  
**Ali Abid Abojassim, Suha H. Kadhim, Hussien Abid Ali Mraity and Rua R. Munim**
- 212 Improvement of As(III) removal with diatomite overlay nanoscale zero-valent iron (nZVI-D): adsorption isotherm and adsorption kinetic studies  
**Nusavadee Pojananukij, Kitirote Wantala, Sutasinee Neramittagapong, Chitsan Lin, Duangkanok Tanangteerpong and Arthit Neramittagapong**
- 221 The ratio of transpiration to evapotranspiration in a rainfed maize field on the Loess Plateau of China  
**Shanshan Zhou, Wenzhao Liu and Wen Lin**
- 229 The spatial and temporal variation of water use efficiency in the Huai River Basin using a comprehensive indicator  
**Yu Meng, Xiang Zhang, Dunxian She, Junchai Wang and Shaofei Wu**
- 238 The construction of a water rights system in China that is suited to the strictest water resources management system  
**Ming Dou and Yanyan Wang**
- 246 Will greywater reuse really affect the sewer flow? Experience of a residential complex in Al Ain, UAE  
**R. K. Chowdhury and M. A. Rajput**
- 259 Use of multi-objective analysis to reveal the benefits of a water transfer project  
**Rong Tang, Chi Zhang, Wei Ding, Yu Li and Huicheng Zhou**
- 267 Assessing comprehensive performance of biofilm formation and water quality in drinking water distribution systems  
**Li Liu, Yanyan Liu, Qingqing Lu, Guowei Chen and Gang Wang**
- 279 Optimal control of reservoir release temperature through selective withdrawal intake at hydropower dam  
**Tiegang Zheng, Shuangke Sun, Haitao Liu, Qingfu Xia and Quanli Zong**
- 300 Modeling of the fouling of inside-out hollow fiber UF membranes  
**Xudong Wang, Danxi Huang, Lei Wang, Xiaorong Meng, Yongtao Lv and Siqing Xia**
