# Water Supply

## Volume 21, Number 6

### Contents

**Water Supply in Agriculture**

- Editorial: Could advances in geoinformatics, irrigation management and climate adaptive agronomic practices ensure the sustainability of water supply in agriculture?
  
  Nektarios N. Kourgialas

- Assessment of maize water status using a consumer-grade camera and thermal imagery
  
  Fatemeh Mousabeygi, Yousef Rezaei and Samira Akhavan

- Estimation of ecosystem evapotranspiration in a *Robinia pseudoacacia* L. plantation with the use of the eddy covariance technique and modeling approaches
  
  Nikos Markos and Kalliopi Radoglou

- Rainfed cultivation with supplemental irrigation modelling on seed yield and oil of *Coriandrum sativum* L. using precision agriculture and GIS moisture mapping
  
  Agathos Filintas, Eleni Wogiatzi and Nikolaos Gougoulias

- Predicting the infiltration characteristics for semi-arid regions using regression trees
  
  Parveen Sihag, Munish Kumar and Saad Sh. Sammen

- Prediction of groundwater trends for irrigation in Northern Bangladesh
  
  Mohammad Abid Hossain Mridha and Syed Hafizur Rahman

- Two-dimensional numerical simulations of soil-water and heat flow in a rainfed soybean field under plastic mulching
  
  Mohammad Abdul Kader, Kimihito Nakamura, Masateru Senge and Mohammad Abdul Mojid

- The use of the pilot points method on groundwater modelling for a degraded aquifer with limited field data: the case of Lake Karla aquifer
  
  G. Tziatzios, P. Sidiropoulos, L. Vasiliades, A. Lyra, N. Mylopoulos and A. Loukas

- Water and soil environmental vulnerability of artificial oases in arid areas and its temporal and spatial differentiation and evolution
  
  Cundong Xu, Zijin Liu, Xinglin Zhu, Junjiao Tian, Fengyou Gu and Yan Wang

- HYDRUS-2D simulations of nitrate nitrogen and potassium transport characteristics under fertilizer solution infiltration of furrow irrigation
  
  Wei-Bo Nie, Kun-Kun Nie, Yi-Bo Li and Xiao-Yi Ma

- Simulation soil water–salt dynamics in saline wasteland of Yongji Irrigation Area in Hetao Irrigation District of China
  
  Chengfu Yuan
2691 Understanding nitrogen transport in the unsaturated zone with fluctuations in groundwater depth
Jianmin Bian, Qian Wang, Siyu Nie, Hanli Wan and Juanjuan Wu

2709 Optimal water allocation method for joint operation of a reservoir and pumping station under insufficient irrigation
Cong Wei, Jilin Cheng, Yi Gong and Zhihao Gong

2720 Application of the ‘theory of planned behavior’ to understand farmers’ intentions to accept water policy options using structural equation modeling
Taghi Mahdavi

2735 Effect of irrigation practices upon yield and fruit quality of four grapefruit (Citrus paradisi Mac.) cultivars
G. Morianou, V. Ziogas, N. N. Kourgialas and G. P. Karatzas

2748 Impacts of irrigation and nitrate fertilization scenarios on groundwater resources quantity and quality of the Almyros Basin, Greece
Aikaterini Lyra, Athanasios Loukas and Pantelis Sidiropoulos

2760 Estimating the future hydric needs of Baja California, Mexico. Assessment of scenarios to stop being a region with water scarcity
A. Cortés-Ruiz and I. Azuz-Adeath

2772 Sprinkler droplet impact angle affects shear stress distribution on soil surface – a case study of a ball-driven sprinkler
Xin Hui, Haijun Yan, Yuncheng Xu and Haibin Tan

2786 A simplified method to improve water distribution and application uniformity for sprinkler irrigation on sloping land: adjustment of riser orientation
Xin Hui, Haijun Yan, Lin Zhang and Junying Chen

2799 Water reuse potential for irrigation in Brazilian hydrographic regions
Maira Lima, Bruna Magalhães de Araujo, Sérgio Rodrigues Ayrimoraes Soares, Ana Silvia Pereira Santos and José Manuel Pereira Vieira

2811 Characteristics and evaluations of heavy metal contents in irrigation water sources on a suburb farmland in the lower reaches of Xijiang River in the early busy season of farming
Ren Jie, Liu Xiao-wen and Wu Ying-xin

2825 Effect of water compounds on photo-disinfection efficacy of TiO₂ NP-embedded cellulose acetate film in natural water
Jing Xie and Yen-Con Hung

2837 Water-sediment separation efficiency prediction of gill-piece separation device
Hongfei Tao, Yang Zhou, Mahemuijiang Aihemaiti, Qiao Li, Wenzin Yang, Youwei Jiang and Zijing Wu

2850 Influence of the soil water retention curve type and magnetic water treatment on lettuce irrigation management responses
Lis Tavares Ordonez Lemos, Fábio Ponciano de Deus, Michael Silveira Thebaldi, Adriano Valentim Diotto, Valter Carvalho de Andrade Júnior and Rodrigo César de Almeida

2863 Effects of magnetized fresh water on seed germination and seeding growth of cotton
Jihong Zhang, Kai Wei, Quanjiu Wang, Yan Sun and Weiyi Mu

2875 Investigation of flow measurement mechanism and hydraulic characteristics of the NACA airfoil pillar-shaped flume with different wing lengths in a rectangular channel
Bin Sun, Lei Yang, Shun Zhu, Haija Zhang, Chao Zhang and Jinping Zhang

2893 Discharge estimation for trapezoidal open channels applying fuzzy transformation method to a flow equation
N. Samarinas and C. Evangelides

2904 Study on optimal start-up time and water usage volume of blowdown residue discharge of mesh filter
Kai Shi, Zhenji Liu, Yan Xie and Man Li
Assessing desertification sensitivity map under climate change and agricultural practices scenarios: the island of Crete case study
G. Morianou, N. N. Kourgialas, V. Pisinaras, G. Psarras and G. Arambatzis

Consumptive water footprints, water use efficiencies and productivities of rice under alternate wetting and drying for Kharagpur, West Bengal, India
A. Biswas, D. R. Mailapalli and N. S. Raghuwanshi

Mitigation of the effects of climate change in the agricultural sector of Cyprus, through optimization of benefit
Y. Economidou, M. K. Doula and A. A. Zorpas

Examining the potential of an irrigation work to improve sustainability in a rural area
Athanasios Ragklos and Vasileios Ambas

Enhancing urban and sub-urban riparian areas through ecosystem services and ecotourism activities
G. Gkiatas, I. Kasapidis, P. Koutalakis, V. Iakovoglou, A. Savvopoulou, I. Germantidis and G. N. Zaimis

Research papers

Study of optimal allocation of water resources in Dujiangyan irrigation district of China based on an improved genetic algorithm
Ruihuan Li, Yingli Chang and Zhaocai Wang

An assessment of groundwater quality in South-West zone of Surat city
Ankit N. Chaudhari, Darshan J. Mehta and Dr. Neeraj D. Sharma

Detection of water quality failure events at treatment works using a hybrid two-stage method with CUSUM and random forest algorithms
Gerald Riss, Michele Romano, Fayyaz Ali Memon and Zoran Kapelan

Development of ANN model for discharge prediction and optimal design of sharp-crested triangular plan form weir for maximum discharge using linked ANN–optimization model
Md. Ayaz and Talib Mansoor

Sami Khettaf, Imen Khoumi, Ghofrane Louhichi, Ahmed Ghrabi, Latifa Bousselmi, Kamel-Eddine Bouhidel and Mohammed Bouhelassa

Experimental and field verifications of radial gates as flow measurement structures
Hossein Khalili Shayan, Javad Farhoudi and Alireza Vatankhah

A comparative study of wavelet and empirical mode decomposition-based GPR models for river discharge relationship modeling at consecutive hydrometric stations
Kiyoumars Roushangar, Masoumeh Chamani, Roghayeh Ghasempour, Hazi Mohammad Azamathulla and Farhad Alizadeh

Analysis of the ultimate water resources carrying capacity in Yancheng, China
Zengchuan Dong, Guang Yang, Shengnan Feng, Jiayi Ma and Bing Li

The impacts of piers on oil spill transport in a typical reach of the Middle Yangtze River
Haibin Xiong, Li Chen and Zhaohua Sun

Ground water toxicity due to fluoride contamination in Southwestern Lahore, Punjab, Pakistan
Abdullah Yasar, Tariq Javed, Firdaus Kausar, Jaweria Shamshad, Muhammad Umar Hayat Khan and Rashid Iqbal

Study of flow over piano key weir of different plan shapes with free and partially submerged outlet conditions
Amiya Abhash, K. K. Pandey and Ravi P. Tripathi
3153  Update of river health assessment indicator system, weight, and assignment criteria in China
Yin Liu, Huidong Su, Shuanghu Zhang and Tiantian Jin

3168  A multivariate analysis of the spatial variations of water quality during high-flow period in the Chaobai River (Beijing, China) restored by reclaimed water
Rui Zhao, Hongmei Bu, Xianfang Song and Yinghua Zhang

3180  An inverse design method for determining the optimal tributary flow into a main stream in a rainstorm period
Lei Liu, Huimin Chen and Xue-Yi You

3193  The variation and attribution analysis of the runoff and sediment in the lower reach of the Yellow River during the past 60 years
Hongxiang Wang, Jinghang Liu and Wenxian Guo

3210  Fuzzy numerical solution to the unconfined aquifer problem under the Boussinesq equation
N. Samarinas, C. Tzimopoulos and C. Evangelides

3225  Analysis of water quality indices and machine learning techniques for rating water pollution: a case study of Rawal Dam, Pakistan
Mehreen Ahmed, Rafia Mumtaz and Syed Mohammad Hassan Zaidi

3251  Indicator system optimization model for evaluating resilience of regional agricultural soil-water resource composite system
Dan Xu, Jilong Liu, Dong Liu, Qiang Fu, Mo Li, Muhammad Abrar Faiz, Sicheng Liu, Tianxiao Li, Song Cui and Ge Yan
