Water Science and Technology: Water Supply

Volume 8, Number 5

Contents

489  Biofilm control using chlorine-based disinfectants in model drinking water distribution systems
     J. Y. Hu, W. Fang and B. Yu

499  Modeling of NOM-removal in drinking water biofilters
     Xia Qiongqiong, Chen Wei and Zheng Xingcan

505  Optimizing alum coagulation for turbidity, organics, and residual Al reductions
     D. Bérubé and C. C. Dorea

513  Modeling of biofilm in the water distribution system
     Tai-Lee Hu, Chenfang Lin and Wei-Yu Chen

519  Enhancing boron rejection in seawater reverse osmosis facilities
     R. P. Huehmer, F. Wang, J. Lozier and L. Henthorne

527  Polyvalent fingerprint based molecular surveillance methods for drinking water supply systems
     K. Henne, L. Kahlisch, J. Draheim, I. Brettar and M. G. Höfle

533  Modeling of external and internal concentration polarization effect on flux behaviour of forward osmosis
     C. H. Tan and H. Y. Ng

541  The yardstick competition regulatory model: discussing the Portuguese experience
     R. Cunha Marques

551  Evolution of the relation between human society and urban water from ancient roman times to modern urbanization
     Maria Carmela Monteleone

557  Characterization of PVDF hollow-fiber membrane foulants on drinking water treatment
     T. Sasaki, N. Hanazumi, S. Minegishi, M. Henmi and Y. Shimizu

565  Aqueous natural organic matter removal by quaternary-ammonium-compound-modified iron-oxide-coated sand
     Chunli Ding, Chii Shang and Yujung Chang

573  NEWater—multi safety barrier approach for indirect potable use
     H. Seah, T. P. Tan, M. L. Chong and J. Leong

589  Modelling raw water quality—development of a drinking water management tool
     Ch. Kübeck, W. van Berk and A. Bergmann
