Contents

Remediation

1 Restoration challenges for urban rivers B.J. D’Arcy, T. Rosenqvist, G. Mitchell, R. Kellagher and S. Billett

Mine water

9 Diffuse pollution associated with the mining sectors in South Africa: a first-order assessment S.E. Cootser, R.G.M. Heath and N. Ndombe

Agriculture

17 Diffuse pollution from intensive agriculture: sustainability, challenges, and opportunities M.R. Burkart

25 Grassed buffer strips as nitrate diffuse pollution remediation tools: management impact on the denitrification enzyme activity M. Cors and B. Tychon

31 Development of a resource protection and waste strategy for water use by the agricultural sector M.E. Ligthelm, R. Ranwedzi, M. Morokane and M. Senne

37 Pesticide retention in an experimental wetland treating non-point source pollution from agriculture runoff A.-G.B. Blankenberg, K. Haarstad and B.C. Braskerud

Catchment management

45 Non-point sources and the waste discharge charge system C.J. von der Heyden, G.C. Pegram and K. Pema

55 Efficacy of constructed wetlands to mitigate non-point source pollution from irrigation tailwaters in the San Joaquin Valley, California, USA A.T. O’Geen, J.J. Maynard and R.A. Dahlgren

63 The ecological value of constructed wetlands for treating urban runoff S. Pankratz, T. Young, H. Cuevas-Arellano, R. Kumar, R.F. Ambrose and I.H. Suffet

Urban management

71 Determination of first flush criteria using dynamic EMCs (event mean concentrations) on highway stormwater runoff L.-H. Kim, S.-M. Jeong and S.-O. Ko

79 Instruments to reduce the leaching of heavy metals from building materials in the Netherlands A.J.H. van Breemen and P.H.M. Vermij

87 Runoff and windblown vehicle spray from road surfaces, risks and measures for soil and water P.N.M. Schipper, R.N.J. Comans, J.J. Dijkstra and L. Vergouwen

Groundwater

97 The influence of diffuse pollution on groundwater content patterns for the groundwater bodies of Germany R. Kunkel, F. Wendland, S. Hannappel, H.J. Voigt and R. Wolter

Rural management

107 A knowledge gap analysis on multi-scale predictive ability for agriculturally derived sediments under South African conditions A.J. van Zyl
Catchment modelling

115 Analysis and modelling of land-based nutrient pollution by watershed models coupled with GIS: a case study from Turkey  A. Erturk, M. Gurel, E. Varol, A. Ekdal, M. Baloch, T. Dikerler, D.Z. Seker and A. Tanik

123 Area-differentiated modelling of P-fluxes in heterogeneous macroscale river basins  B. Tetzlaff, P. Kreins, R. Kunkel and F. Wendland

133 Water fluxes and diffuse nitrate pollution at river basin scale: coupling of agro-economic models and hydrological approaches  F. Wendland, R. Kunkel, H. Bogena, H. Gömann and P. Kreins

Monitoring and analytical

143 Assessment of point and non-point pollution associated with the power generation sector in South Africa  H.D. van Zyl and R.G. Heath

151 The assessment of diffuse pollution from acid-mine drainage using an updated and revised diatom assessment procedure as an added-value bio-monitoring tool  C.G.M. Archibald and J.C. Taylor

Reservoir management

161 Long-term monitoring and proposed diffuse pollution control of a tropical reservoir  E. von Sperling and A.D. Souza

167 Water quality estimation in consideration of pollutant runoff and internal production in Lake Biwa, Japan  A. Ichiki, K. Nakakura, N. Sakata, A. Sasaki and Y. Tai

Pesticides

177 The dynamic water–sediment system: results from an intensive pesticide monitoring campaign  K. Holvoet, P. Seuntjens, R. Mannaerts, V. De Schepper and P.A. Vanrolleghem

Posters

183 The application of bioremediation: reduction of metal concentrations in river water and COD in distillery effluent  V.A. Jackson, A.N. Paulse, A.A. Bester, J.H. Neethling, K.R. Du Plessis and W. Khan
