Water Science and Technology

Volume 58, Number 6

Contents

1155 Modelling nitrite in wastewater treatment systems: a discussion of different modelling concepts
Gu¨rkan Sin, David Kaelin, Marlies J. Kampschreur, Imre Takács, Bernhard Wett, Krist V. Gernaey,
Leiv Rieger, Hansruedi Siegrist and Mark C. M. van Loosdrecht

1173 The impact of alum coagulation on the character, biodegradability and disinfection by-product
formation potential of reservoir natural organic matter (NOM) fractions
Yeow Chong Soh, Felicity Roddick and John van Leeuwen

1181 The creation of management systems for funding priorities in wastewater project in rural communities
in the Islamic Republic of Iran
M. Farrokhi, M. Hajrasoliha, G. Meemari, M. Fahiminia, M. Talebi and M. Kohansal

1187 Inhibition factor of ammonification in stored urine with fecal contamination
S. Hotta and N. Funamizu

1193 Toxicity of reactive red 141 and basic red 14 to algae and waterfleas
S. Vinitnantharat, W. Chartthe and A. Pinisakul

1199 Optimizing sequencing batch reactor (SBR) reactor operation for treatment of dairy wastewater with
aerobic granular sludge
M. Wichern, M. Lübken and H. Horn

1207 Heavy metal (Zn and Cu) complexation and molecular size distribution in wastewater treatment plant effluent
G. G. T. Chaminda, F. Nakajima and H. Furumai

1215 The toxicity of ammonia/ammonium to the vermifiltration wastewater treatment process
R. J. Hughes, J. Nair and G. Ho

1221 Biofilm formation by a biotechnologically important tropical marine yeast isolate, Yarrowia lipolytica NCIM 3589
D. H. Dusane, Y. V. Nancharaiah, V. P. Venugopalan, A. R. Kumar and S. S. Zinjarde

1231 The secret to achieving reliable biological phosphorus removal
M. P. Thomas

1237 Municipal waste sludge digestion in an autothermal aerobic sequencing batch reactor
Gregor D. Zupančič, Viktor Grlic, Milenko Roš and Nataša Uranjek-Ževart

1245 Recirculating gravel filters: high-performance treatment at low cost for two small communities
C. Newton and J. P. Wilson
Combined effect of plate pulsation parameters and phenol concentrations on the phenol removal efficiency of a pulsed plate bioreactor with immobilized cells
K. V. Shetty, M. R. Kedargol and G. Srinikethan

Dynamic weighting system for water quality index
Aabha P. Sargaonkar, Apurba Gupta and Sukumar Devotta

Simultaneous removal of nitrate and pesticides from groundwater using a methane-fed membrane biofilm reactor
O. Modin, K. Fukushi and K. Yamamoto

Submerged membrane bioreactor using fly ash filters: trials with distillery wastewater
R. Gupta, Y. Satyawali, V. S. Batra and M. Balakrishnan

Microbial effects on phosphorus release in aquatic sediments
Ting-Lin Huang, Xiao-Chun Ma, Hai-bing Cong and Bei-Bei Chai

The effect of hydrodynamic flow regimes on the algal bloom in a monomictic reservoir
Se-Woong Chung, Heungsoo Lee and Yongrock Jung

Improving rejection of organic fractions in reclaimed water based on intermolecular interaction effect
J. Y. Hu, J. H. Shan and S. L. Ong

A measure for provisional-and-urgent sanitary improvement in developing countries: septic-tank performance improvement
H. Harada, N. T. Dong and S. Matsui

Performance evaluation of a simple wastewater treatment system comprised by UASB reactor, shallow polishing ponds and coarse rock filter

Phosphorus recovery from anaerobic digester supernatant by struvite crystallization: model-based evaluation of a fluidized bed reactor
M. S. Rahaman, D. S. Mavinic and N. Ellis

Is it PAO-GAO competition or metabolic shift in EBPR system? Evidence from an experimental study
Ufuk G. Erdal, Zeynep K. Erdal, Glen T. Daigger and Clifford W. Randall

Anammox process for synthetic and practical wastewater treatment using a novel kind of biomass carriers
Sen Qiao, Yuki Kawakubo, Yingjun Cheng, Takashi Nishiyama, Takao Fujii and Kenji Furukawa
