Water Science and Technology

Volume 59, Number 11

Contents

2083  Microbiological monitoring of acid mine drainage treatment systems and aquatic surroundings using real-time PCR
  J. S. Han and C. G. Kim

2093  Biological nitrogen and phosphorus removal in UCT-type MBR process
  H. Lee, J. Han and Z. Yun

2101  Evaluation of pollutants removal efficiency to achieve successful urban river restoration
  Sung Min Cha, Young Sik Ham, Seo Jin Ki, Seung Won Lee, Kyung Hwa Cho,
  Yongeun Park and Joon Ha Kim

2111  Growth of microalgae in diluted process water of the animal wastewater treatment plant
  Ki Young Park, Byung-Ran Lim and Kisyay Lee

2117  An analytical model for non-conservative pollutants mixing in the surf zone
  Seo Jin Ki, Jin Hwan Hwang, Joo-Hyon Kang and Joon Ha Kim

2125  Quantification of diffuse and concentrated pollutant loads at the watershed-scale: an Italian case study
  Angela Candela, Gabriele Freni, Giorgio Mannina and Gaspare Viviani

2137  Enhanced bio-energy recovery in a two-stage hydrogen/methane fermentation process
  M. J. Lee, J. H. Song and S. J. Hwang

2145  Biofilm/membrane filtration for reclamation and reuse of rural wastewaters
  Kil-Soo Hyun and Seok-Ju Lee

2153  Reduction of nitrate by resin-supported nanoscale zero-valent iron
  Heesu Park, Yong-Min Park, Kyoung-Min Yoo and Sang-Hyup Lee

2159  Economical and technical efficiencies evaluation of full scale piggery wastewater treatment BNR plants
  S. W. Oa, E. Choi, S. W. Kim, K. H. Kwon and K. S. Min

2167  Statistical assessment for spatio-temporal water quality in Angkor, Cambodia
  Seo Jin Ki, Joo-Hyon Kang, Young Geun Lee, Yun Seok Lee, Suthipong Sthiannopkao and Joon Ha Kim

2179  Decolorization and semi-batch continuous treatment of molasses distillery wastewater
  by Aspergillus tubingensis DCT6
  T. Watanabe, M. Tanaka, K. Masaki, T. Fuji and H. Iefuji

2187  Unit soil loss rate from various construction sites during a storm
  Marla C. Maniquiz, Soyoung Lee, Eunju Lee, Dong-Soo Kong and Lee-Hyung Kim
A new methodology for determining dispersion coefficient using ordinary and partial differential transport equations
Kyung Hwa Cho, Seungwon Lee, Young Sik Ham, Jin Hwan Hwang, Sung Min Cha, Yongeun Park and Joon Ha Kim

Improvement of the resolution in direct membrane integrity test by controlling solution surface tension

Performance and fouling characteristics of different pore-sized submerged ceramic membrane bioreactors (SCMBR)
Le Jin, How Yong Ng and Say Leong Ong

Interpretation of seasonal water quality variation in the Yeongsan Reservoir, Korea using multivariate statistical analyses
Kyung Hwa Cho, Yongeun Park, Joo-Hyon Kang, Seo Jin Ki, Sungmin Cha, Seung Won Lee and Joon Ha Kim

Toxicity of artificial runoff fostered with dry deposition particulates from industrial, commercial, and highway area in Gwangju, Korea

P controller calibration for the real time control of moveable weirs in (proportional) sewer channels
A. Campisano, E. Creaco and C. Modica

Quantitative Bayesian predictions of source water concentration for QMRA from presence/absence data for E. coli O157: H7
S. R. Petterson, N. Dumoutier, J. F. Loret and N. J. Ashbolt

Preliminary evaluation of a constructed wetland for treating extremely alkaline (pH 12) steel slag drainage
W. M. Mayes, J. Aumônier and A. P. Jarvis

Herbal pharmaceutical wastewater treatment by a pilot scale upflow anaerobic sludge blanket (UASB) reactor
S. Satyanarayan, A. Karambe and A. P. Vanerkar

Sewer exfiltration and the colimation layer
J. B. Ellis, D. M. Revitt, J. Vollertsen and D. J. Blackwood

Treatment of local scrubber wastewater for semiconductor by using photo-catalytic ozonation
Chung-Yi Chou, Chien-Pin Huang, Neng-Chou Shang and Yue-Hwa Yu

Atmospheric fluxes of nutrients onto Singapore Strait
P. Sundarambal, R. Balasubramanian and P. Tkalich
