Water Science and Technology

Volume 62, Number 6

Contents

1213 Enhancement of settling tank capacity using a new type of tube settler
K. Fujisaki

1221 Impacts of urbanization on hydrology in the Yangtze River Delta, China
Xu Youpeng, Xu Jintao, Ding Jinjia, Chen Ying, Yin Yixing and Zhang Xingqi

1230 Analysis of uncertainty propagation through model parameters and structure
Abhijit Patil and Zhi-Qiang Deng

1240 Fungi immobilization for landfill leachate treatment
Jenjira Saetang and Sandhya Babel

1248 Updating a model of pulp and paper wastewater treatment in a partial-mix aerated stabilization basin system
Curtis W. Bryant

1256 Photocatalytic decoloration of Acid Red 27 in presence of SnO$_2$ nanoparticles

1265 Managed aquifer recharge with reclaimed water: approaches to a European guidance framework
R. Hochstrat, T. Wintgens, C. Kazner, P. Jeffrey, B. Jefferson and T. Melin

1274 Integration of ceramic membrane and compressed air-assisted solvent extraction (CASX) for metal recovery
Chi-Wang Li, Chun-Hao Chiu, Yu-Cheng Lee, Chia-Hao Chang, Yu-Hsun Lee and Yi-Ming Chen

1281 Microbial population dynamics of granular aerobic sequencing batch reactors during start-up and steady state periods

1288 Long-term changes in the effluent load from pulp and paper mills, the introduction of BAT technology, and their effects on extractable organic halogens concentrations in sediment in part of the Bothnian Bay
R. Pöyköinen, H. Nurmesniemi, V. A. Kivilinna and T. Kuokkanen

1296 Safe greywater reuse to augment water supply and provide sanitation in semi-arid areas of rural India
S. Godfrey, P. Labhasetwar, S. Wate and B. Jimenez

1304 The catalytic oxidation of malachite green by the microwave-Fenton processes
Huaili Zheng, Huiqin Zhang, Xiaonan Sun, Peng Zhang, Tiroyaone Tshukudu and Guocheng Zhu

1312 Biodegradability and toxicity assessment of bleach plant effluents treated anaerobically
T. R. Chaparro, C. M. Botta and E. C. Pires

1320 Evaluation of heterogeneous photo-Fenton oxidation of Orange II using response surface methodology
Y. H. Gong, H. Zhang, Y. L. Li, L. J. Xiang, S. Royer, S. Valange and J. Barrault
1327 Removal of phenol in a constructed wetland system and the relative contribution of plant roots, microbial activity and porous bed
  E. Kurzbaum, Y. Zimmels, F. Kirzhner and R. Armon

1335 Assessing the risk of exogenously consumed pharmaceuticals in land-applied human urine
  U. Khan and J. A. Nicell

1346 Settling behaviour of pellet flocs in pelleting flocculation process: analysis through operational conditions
  Zhang Gang, Huang Ting-lin, Tan Chi, Li Zhan-peng, He Wen-jie, Han Hong-da and Li Chen

1353 Preliminary study of osmotic membrane bioreactor: effects of draw solution on water flux and air scouring on fouling

1361 Operational energy performance assessment system of municipal wastewater treatment plants
  Lingbo Yang, Siyu Zeng, Jining Chen, Miao He and Wan Yang

1371 Technical-economic analysis of selected decentralized technologies for municipal wastewater treatment in the city of Rome
  Renato Gavasci, Agostina Chiavola and Massimo Spizzirri

1379 Impact of a metabolic uncoupler, 2,4-dichlorophenol on minimization of activated sludge production in membrane bioreactor
  Lin Song, Jiang Wenju, Tang Qiong and Li Yaozhong

1386 Flood analysis in mixed-urban areas reflecting interactions with the complete water cycle through coupled hydrologic-hydraulic modelling
  N. D. Sto. Domingo, A. Refsgaard, O. Mark and B. Paludan

1393 Sensitivity analysis of an urban stormwater microorganism model

1401 Comparative evaluation of runoff and water quality using HSPF and SWMM
  Sae-Bom Lee, Chun-Gyeong Yoon, Kwang Wook Jung and Ha Sun Hwang

1410 Optimization of a novel enzyme treatment process for early-stage processing of sheepskins
  Y. F. Lim, J. E. Bronlund, T. F. Allsop, A. N. Shilton and R. L. Edmonds

1416 Fate of indicator endocrine disrupting chemicals in sewage during treatment and polishing for non-potable reuse
  Mike Holmes, Anu Kumar, Ali Shareef, Hai Doan, Richard Stuetz and Rai Kookana

1424 Treatment of pesticide rinsate towards reuse by photosensitized Fenton-like process
  W. S. Kuo and Y. Y. Ho

1432 Effect of pH reduction on polyphosphate- and glycogen-accumulating organisms in enhanced biological phosphorus removal processes
  Toshikazu Fukushima, Motoharu Onuki, Hiroyasu Satoh and Takashi Mino

1440 Characteristics of nitrogen removal and microbial distribution by application of spent sulfidic caustic in pilot scale wastewater treatment plant
  S. Park, J. Lee, J. Park, I. Byun, T. Park and T. Lee

1448 Controls on groundwater nitrogen contributions from on-site wastewater systems in coastal North Carolina
  C. P. Humphrey Jr., M. A. O’Driscol and M. A. Zarate
