

Water Science and Technology

Volume 65, Number 6

Contents

- 977 Radial distribution modeling of liquid-phase phenol concentration in a liquid–solid fluidized bed photoreactor
Shuangshi Dong, Dandan Zhou and Xiaotao Bi
- 983 Use of a stable carbon isotope to assess the efficiency of a drinking water treatment method with CO₂
M. Poberžnik, A. Leis and A. Lobnik
- 989 Evaluation of DNA isolation procedures for detecting and quantifying environmental *Legionella* by real-time quantitative PCR
N.-T. Chen, C.-W. Chang and J.-D. Wu
- 998 The organic contamination survey and health risk assessment of sixteen source water reservoirs in Haihe River basin
Jijun Gao, Linghua Liu, Xiaoru Liu, Jin Lu, Hong Hao, Hao Yuan and Huidong Zhou
- 1007 Computational simulation of flocculent sedimentation based on experimental results
Mafeni S. Ramatsoma and Evans M. N. Chirwa
- 1014 Modelling of ionic interactions with wastewater treatment biomass
S. Westergreen, C. J. Brouckaert and K. M. Foxon
- 1021 Influence of surface modification of polyethylene biocarriers on biofilm properties and wastewater treatment efficiency in moving-bed biofilm reactors
Sheng Chen, Xiang Cheng, Xu Zhang and Dezhi Sun
- 1027 Visible light assisted photocatalytic degradation of methyl orange using Ag/N–TiO₂ photocatalysts
Deyong Wu and Mingce Long
- 1033 A novel up-flow inner-cycle anoxic bioreactor (UIAB) system for the treatment of sulfide wastewater from purification of biogas
Ziyu Song, Qiang Li, Dan Wang, Jie Zhang and Jianmin Xing
- 1041 Preparation, characterization and performance of a novel PVDF/PMMA/TPU blend hollow fiber membrane for wastewater treatment
C. Y. Ma, J. P. Huang and D. L. Xi
- 1048 An approach for phosphate removal with quartz sand, ceramsite, blast furnace slag and steel slag as seed crystal
Liping Qiu, Guangwei Wang, Shoubin Zhang, Zhongxi Yang and Yanbo Li
- 1054 Hierarchical MnO₂ nanostructures: synthesis and their application in water treatment
Rui Zhai, Yazhen Wan, Lin Liu, Xiang Zhang, Weiqiang Wang, Jindun Liu and Bing Zhang
- 1060 Effects of surfactant on bubble hydrodynamic behavior under flotation-related conditions in wastewater
Yanpeng Li, Tingting Zhu, Yanyan Liu, Ye Tian and Huanran Wang

- 1067 Stochastic modeling to identify requirements for centralized monitoring of distributed wastewater treatment
T. Hug and M. Maurer
- 1076 Seasonal variation of fecal indicator bacteria in storm events within the US stormwater database
Xubin Pan and Kim D. Jones
- 1081 Biodegradation of 4-methylaniline in a sequencing batch reactor
Iván Moreno-Andrade and Germán Buitrón
- 1087 Critical modeling parameters identified for 3D CFD modeling of rectangular final settling tanks for New York City wastewater treatment plants
K. Ramalingam, S. Xanthos, M. Gong, J. Fillos, K. Beckmann, A. Deur and J. A. McCorquodale
- 1095 Water quality trends in the last decade for ten watersheds dominated by diffuse pollution in Québec (Canada)
M. Patoine, S. Hébert and F. D'Auteuil-Potvin
- 1102 Treatment of domestic sewage by a metal membrane bioreactor
Y. H. Xie, T. Zhu, C. H. Xu, T. Nozaki and K. Furukawa
- 1109 Evaluation of a hybrid vertical membrane bioreactor (HVMBR) for wastewater treatment
L. Rodríguez-Hernández, A. L. Esteban-García, A. Lobo, J. Temprano, C. Álvaro, A. Mariel and I. Tejero
- 1116 A data-driven model for maximization of methane production in a wastewater treatment plant
Andrew Kusiak and Xiupeng Wei
- 1123 Model-based knowledge acquisition in environmental decision support system for wastewater integrated management
Pau Prat, Lorenzo Benedetti, Lluís Corominas, Joaquim Comas and Manel Poch
- 1130 A mechanistic model for fate and removal of estrogens in biological nutrient removal activated sludge systems
M. Lust, J. Makinia and H. D. Stensel
- 1137 Testing the effectiveness of monolayers under wind and wave conditions
C. Palada, P. Schouten and C. Lemckert
- 1142 Methane potential and biodegradability of rice straw, rice husk and rice residues from the drying process
L. M. Contreras, H. Schelle, C. R. Sebrango and I. Pereda
