Water Science and Technology

Volume 67, Number 12

Contents

2677 A model for anaerobic ponds combining settling and biological processes
K. R. Effebi, H. Jupsin, C. Keffala and J. L. Vasel

2684 Impact of urban WWTP and CSO fluxes on river peak flow extremes under current and future climate conditions
Ingrid Keupers and Patrick Willems

2691 Experience from start-ups of the first ANITA Mox Plants
M. Christensson, S. Ekström, A. Andersson Chan, E. Le Vaillant and R. Lemaire

2699 Energy efficiency in membrane bioreactors
B. Barillon, S. Martin Ruel, C. Langlais and V. Lazarova

2706 Aeration performance of hydrodynamic flow regulators
P. Wójtowicz and M. Szlachta

2713 Variation in PAH patterns in road runoff
Rupak Aryal, Hiroaki Furumai, Fumiyuki Nakajima and Simon Beecham

2720 Formulation and optimization of biological removal of flue gas pretreatment wastewater and sulfur recycling process by Box–Behnken design
Juan Wang, Yuan Cao and Qin Zhong

2726 Assessment of detection limits of fiber-optic distributed temperature sensing for detection of illicit connections
Jaap Nienhuis, Cornelis de Haan, Jeroen Langelveld, Martijn Klootwijk and François Clemens

2733 UV disinfection of wastewater flocs: the effect of secondary treatment conditions

2738 Modelling and dynamic simulation of struvite precipitation from source-separated urine
Philip A. Schneider, James W. Wallace and Julian C. Tickle

2747 Modelling biological Cr(VI) reduction in aquifer microcosm column systems
Pulane E. Molokwane and Evans M. N. Chirwa

2753 Constructed wetlands for combined sewer overflow treatment in a Mediterranean country, Portugal
R. Amaral, F. Ferreira, A. Galvão and J. S. Matos

2760 Performance evaluation of a novel open trickling filter for the post-treatment of anaerobic effluents from small communities
The variation of volatile fatty acid compositions in sewer length, and its effect on the process design of biological nutrient removal
Z. Yun, G. H. Yun, H. S. Lee and T. U. Yoo

Simultaneous removal of nitrogen and phosphorus from wastewater by means of FeS-based autotrophic denitrification
Ruihua Li, Jianmin Niu, Xinmin Zhan and Bo Liu

Chromium removal with cross-linked chitosan adsorption and base-precipitation combination
Huixin Zhang, Feng Wang, Xiuhong Jin, Yuchao Zhu, Xiaona Li and Hongyong Zhou

First detection of human sapoviruses in river water in South Africa
T. Y. Murray, J. Mans and M. B. Taylor

Experimental study on calcium carbonate precipitation using electromagnetic fields treatment
Miao Xuefei, Xiong Lan, Chen Jiapeng, Yang Zikang and He Wei

Wastewater effluent characteristics from a Moroccan Textile Industry
Y. Mountassir, A. Benyaich, M. Rezrazi, P. Berçot and L. Gebrati

Velocity gradient as a tool to characterise the link between mixing and biogas production in anaerobic waste digesters
R. Sindall, J. Bridgeman and C. Carliell-Marquet

Technical and economic analysis of real anaerobic digester centrate by means of partial nitrification and sustainable heterotrophic denitrification

Chemical feed control using coagulation computer models and a streaming current detector
Alex A. Yavich and Jim Van De Wege

Industrial flue gas desulphurization waste may offer an opportunity to facilitate SANI® application for significant sludge minimization in freshwater wastewater treatment
J. Qian, F. Jiang, H. K. Chui, Mark C. M. van Loosdrecht and G. H. Chen

Enhancement of waste activated sludge anaerobic digestion by a novel chemical free acid/alkaline pretreatment using electrolysis
W. Charles, B. Ng, R. Cord-Ruwisch, L. Cheng, G. Ho and A. Kayaalp

A multivariate approach to assess habitat integrity in urban streams using benthic macroinvertebrate metrics
S. Canobbio, A. Azzellino, R. Cabrini and V. Mezzanotte

Evaluation of WAS reduction efficiency using kinetic parameters in pilot-scale SBR operated with anaerobic sludge holding tank
Duck-Hyun Nam and Ki-Hoon Kang

Concurrent photocatalytic hydrogen production and organic degradation by a composite catalyst film in a two-chamber photo-reactor
Xi Wang and Xiao-yan Li

Granulation of biological flocs under elevated pressure: characteristics of granules
Yang-Min Liang, Jie-Yuan Chen, Gaëtan Marchesini, Chi-Wang Li and Shiao-Shing Chen

Alternatives for energy production in aerobic wastewater treatment facilities
Sharon B. Velasquez-Orta

Co-digestion of glycerine and sewage sludge to optimise green electricity production
L. Maes, M. Weemaes, N. Hellinck, G. De Gueldre and B. Van De Steene

Removal characteristics of retinoic acids and 4-oxo-retinoic acids in wastewater by activated sludge treatment
D. Inoue, K. Sawada, Y. Wada, K. Sei and M. Ike

Biosurfactants as demulsifying agents for oil recovery from oily sludge – performance evaluation
Evans M. N. Chirwa, Tshepo Mampholo and Oluwademilade Fayemiwo
