

Water Science and Technology

Volume 69, Number 1

Contents

- 1 Metabolic profiling of biofilm bacteria known to cause microbial influenced corrosion
D. J. Beale, P. D. Morrison, C. Key and E. A. Palombo
- 9 Performance evaluation and bacteria analysis of AFB-MFC enriched with high-strength synthetic wastewater
Jian-sheng Huang, Yong Guo, Ping Yang, Chong-ming Li, Hui Gao, Li Feng and Yun Zhang
- 15 Effect of ambient temperatures on disinfection efficiency of various sludge treatment technologies
Katrin Bauerfeld
- 25 Separation of solids and disinfection for agronomical use of the effluent from a UASB reactor
G. C. Sundefeld Junior, R. P. Piveli, S. A. Cutolo, S. S. Ferreira Filho and J. G. Santos
- 31 Characterizing *o*- and *p*-nitrophenols adsorption onto innovative activated carbon prepared from date pits
Hossam Altaher and Andrea M. Dietrich
- 38 Treatment of municipal wastewater using horizontal flow constructed wetlands in Egypt
Sohair I. Abou-Elela, G. Golinelli, Abdou Saad El-Tabl and Mohammed S. Hellal
- 48 A molecular imprinted polymer based sensor for measuring phosphate in wastewater samples
Christopher Warwick, Antonio Guerreiro, Elizabeth Wood, James Kitson, James Robinson and Ana Soares
- 55 Organic removal activity in biofilm and suspended biomass fractions of MBBR systems
Maria Piculell, Thomas Welander and Karin Jönsson
- 62 Development of a highly specific and productive process for *n*-caproic acid production: applying lessons from methanogenic microbiomes
M. T. Agler, C. M. Spirito, J. G. Usack, J. J. Werner and L. T. Angenent
- 69 Polychlorinated dibenzo-*p*-dioxins and polychlorinated dibenzofuran concentrations in Xingyun Lake sediment close to the pulp mill region of Jiangchuan (China): a typical case study
Xue-Fei Zhou
- 76 Dielectric barrier discharge induced degradation of diclofenac in aqueous solution
Shaopeng Rong, Yabing Sun, Zehua Zhao and Huiying Wang
- 84 Oxygen-induced dynamics of nitrous oxide in water and off-gas during the treatment of digester supernatant
F. Stenström, K. Tjus and J. la Cour Jansen
- 92 Is H₂S a suitable process indicator for odour abatement performance of sewer odours?
B. Wang, E. C. Sivret, G. Parcsi, X. Wang, N. M. Le, S. Kenny, H. Bustamante and R. M. Stuetz

- 99 Assessment of the effects of greywater reuse on gross solids movement in sewer systems
R. Penn, M. Schütze and E. Friedler
- 106 French vertical flow constructed wetlands: a need of a better understanding of the role of the deposit layer
Pascal Molle
- 113 Enhanced photocatalytic activity of CeO₂ using β -cyclodextrin on visible light assisted decoloration of methylene blue
Sakthivel Pitchaimuthu and Ponnusamy Velusamy
- 120 Acclimation of the trichloroethylene-degrading anaerobic granular sludge and the degradation characteristics in an upflow anaerobic sludge blanket reactor
Ying Zhang, Yang Liu, Miao Hu and Zhao Jiang
- 128 Toluene in sewage and sludge in wastewater treatment plants
Bozena Mrowiec
- 135 The need for electronic noses for environmental odour exposure assessment
Laura Capelli, Licinia Dentoni, Selena Sironi and Renato Del Rosso
- 142 Comparison of two standard odor intensity evaluation methods for odor problems in air or water
Jane Curren, Cherie L. (Cher) Snyder, Samantha Abraham and I. H. (Mel) Suffet
- 147 Magnetic Fe₃O₄@C nanoparticles as adsorbents for removal of amoxicillin from aqueous solution
Babak Kakavandi, Ali Esrafil, Anoushiravan Mohseni-Bandpi, Ahmad Jonidi Jafari and Roshanak Rezaei Kalantary
- 156 Reduction of organic trace compounds and fresh water consumption by recovery of advanced oxidation processes treated industrial wastewater
S. Bierbaum, H.-J. Öller, A. Kersten and A. Krivograd Klemenčič
- 163 Studies of Pb²⁺ adsorption by *Moringa oleifera* Lam. seeds from an aqueous medium in a batch system
Ana Paula Meneghel, Affonso Celso Gonçalves Jr., César Ricardo Teixeira Tarley, José Renato Stangarlin, Fernanda Rubio and Herbert Nacke
- 170 Preferential catalytic ozonation of *p*-nitrophenol by molecularly imprinted Fe₃O₄/SiO₂ core-shell magnetic composites
Jiannan Yang, Shuzhen Li, Yibin Gong, Chun He, Qiong Zhang, Jinqing Wu, Weichen Liao, Dong Shu and Shuanghong Tian
- 177 Polyhydroxyalkanoate (PHA) production from sludge and municipal wastewater treatment
F. Morgan-Sagastume, F. Valentino, M. Hjort, D. Cirne, L. Karabegovic, F. Gerardin, P. Johansson, A. Karlsson, P. Magnusson, T. Alexandersson, S. Bengtsson, M. Majone and A. Werker
- 185 Perfluorooctanoate and perfluorooctane sulfonate in South African river water
J. B. N. Mudumbi, S. K. O. Ntwampe, F. M. Muganza and J. O. Okonkwo
- 195 Kinetic evaluation of chromium(VI) sorption by water lettuce (*Pistia*)
Rupa Chakraborty, Sukalpa Karmakar, Somnath Mukherjee and Sunil Kumar
- 202 Membrane filtration of agro-industrial wastewaters and isolation of organic compounds with high added values
Dimitris P. Zagklis and Christakis A. Paraskeva
- 208 Modelling ammonium-oxidizing population shifts in a biofilm reactor
T. P. W. Vannecke, N. Bernet, J.-P. Steyer and E. I. P. Volcke
- 217 Simultaneous carbon and nitrogen removal from municipal wastewater in full-scale unaerated/aerated submerged filters
A. Jácome, J. Molina, R. Novoa, J. Suárez and S. Ferreiro
