Water Science and Technology

Volume 71, Number 1

Contents

1 Wastewater treatment performance efficiency of constructed wetlands in African countries: a review
   Andualem Mekonnen, Seyoum Leta and Karoli Nicholas Njau

9 Dewatering as a non-toxic control of nuisance midge larvae in algal wastewater treatment floways
   Troy A. Keller and Emily M. Husted

15 Modeling bioaugmentation with nitrifiers in membrane bioreactors
   Alberto Mannucci, Giulio Munz, Gualtiero Mori, Jacek Makinia, Claudio Lubello and Jan A. Oleszkiewicz

22 Adaptive neuro-fuzzy inference system for real-time monitoring of integrated-constructed wetlands
   Mawuli Dzakpasu, Miklas Scholz, Valerie McCarthy, Siobhán Jordan and Abdulkadir Sani

31 Commercial microwave links instead of rain gauges: fiction or reality?
   Martin Fencí, Jörg Rieckermann, David Stránský and Vojtěch Bareš

38 Removal and bioaccumulation of heavy metals from aqueous solutions using freshwater algae
   Isha Shamshad, Sardar Khan, Muhammad Waqas, Nadeem Ahmad, Khushnood -Ur-Rehman and Kifayatullah Khan

45 Influence of local calibration on the quality of online wet weather discharge monitoring: feedback from five international case studies
   Nicolas Caradot, Hauke Sonnenberg, Pascale Rouault, Günter Gruber, Thomas Hofer, Andres Torres, Maria Pesci and Jean-Luc Bertrand-Krajewski

52 Two-phase anaerobic co-digestion of food waste and sewage sludge
   Feng Wang, Wei-Ying Li and Xue-Nong Yi

59 Scale-dependence effects of landscape on seasonal water quality in Xitiaoxi catchment of Taihu Basin, China
   Huihua Lv, Youpeng Xu, Longfei Han and Feng Zhou

67 Alkaline treatment of high-solids sludge and its application to anaerobic digestion
   Chenchen Li, Huan Li and Yuyao Zhang

75 Characteristics of hydrocarbon hydroxylase genes in a thermophilic aerobic biological system treating oily produced wastewater
   Ruyin Liu, Yingxin Gao, Yifeng Ji, Yu Zhang and Min Yang

83 The study of capacitive deionization behavior of a carbon nanotube electrode from the perspective of charge efficiency
   Haibo Li, Sen Liang, Mangmang Gao, Guolong Li, Jin Li and Lijun He

89 Predicting wastewater temperatures in sewer pipes using abductive network models
   M. Abdel-Aal, M. Mohamed, R. Smits, R. E. Abdel-Aal, K. De Gussem, A. Schellart and S. Tait
97 Effect of sulfate and lactate loading rates on the respiration process and microbial population changes measured by ecological indices
  C. García-Saucedo, F. J. Fernández, F. M. Cuervo-López and J. Gómez

105 Biohydrogen production from industrial wastewaters
  Iván Moreno-Andrade, Gloria Moreno, Gopalakrishnan Kumar and Germán Buitrón

111 Study of the sludge reduction in an oxic–settling–anaerobic activated sludge process based on UNITANK
  L. P. Sun, J. F. Chen, W. Z. Guo, X. P. Fu, J. X. Tan and T. J. Wang

117 Characterization of organic fouling in reverse osmosis membranes by headspace solid phase microextraction and gas chromatography–mass spectrometry
  C. Martínez, V. Gómez, E. Pocurull and F. Borrull

126 Comparative study on electrochemical 4-chlorophenol degradation in different diaphragm systems with combined reduction and oxidation properties
  S. L. Liu, H. Wang and Z. Y. Bian

131 Basis for the development of sustainable optimisation indicators for activated sludge wastewater treatment plants in the Republic of Ireland
  G. T. Gordon and B. P. McCann

139 Removal and recovery of lead (Pb²⁺) from industrial effluent using indigenous and tailor-made Aureobasidium sp. RBSS-303
  Kiran Aftab, Kalsoom Akhtar and Fozia Anjum

149 Can we model the implementation of water sensitive urban design in evolving cities?
  Peter Marcus Bach, David T. Mccarthy and Ana Deletic

157 Erratum: Water Science and Technology 56(3), 2007, 233–240: Comparison of measured and simulated distribution of microbial biomass in subsurface vertical flow constructed wetlands
  Guenter Langergraber
