

Water Science and Technology

Volume 72, Number 10

Contents

- 1675 Flexible engineering designs for urban water management in Lusaka, Zambia
Lucy Tembo, Assela Pathirana, Peter van der Steen and Chris Zevenbergen
- 1682 Enzyme-linked immunosorbent assay for triclocarban in aquatic environments
Kun Zeng, Yanmin Zou, Jianxia Liu, Wei Wei, Meng Zhang, Jun Zhou, Zhen Zhang and Zikuan Gai
- 1692 Considering microbial and aggregate heterogeneity in biofilm reactor models: how far do we need to go?
Thomas P. W. Vannecke, George Wells, Nathalie Hubaux, Eberhard Morgenroth and Eveline I. P. Volcke
- 1700 Study on mechanism of algal inactivation and pollution removal by Fe-ACF electro Fenton-like process
Jin Zhang and Huan Wang
- 1713 Changes of toxic metals during biological stabilization and their potential ecological risk assessment
Hou-cheng Wang, Zheng-zhong Zeng, He-fei Zhang and Zhong-ren Nan
- 1723 Algae biomass cultivation in nitrogen rich biogas digestate
I. Krustok, J. G. Diaz, M. Odlare and E. Nehrenheim
- 1730 Cross-sectoral optimization and visualization of transformation processes in urban water infrastructures in rural areas
S. Baron, I. Kaufmann Alves, T. G. Schmitt, S. Schöffel and J. Schwank
- 1739 The cost of a small membrane bioreactor
C. H. Lo, E. McAdam and S. Judd
- 1747 Physical design optimization of an urban runoff treatment system using Stormwater Management Model (SWMM)
J. A. S. Tobio, M. C. Maniquiz-Redillas and L. H. Kim
- 1754 Evaluating the application of *Microbacterium* sp. strain BR1 for the removal of sulfamethoxazole in full-scale membrane bioreactors
A. Fenu, B. M. R. Donckels, T. Beffa, C. Bemfohr and M. Weemaes
- 1762 Dynamic simulation of water resources in an urban wetland based on coupled water quantity and water quality models
Weibo Zeng, Youpeng Xu, Xiaojun Deng, Longfei Han and Qianyu Zhang
- 1774 Cultivation of an *Arthrospira platensis* with digested piggery wastewater
Rui Liu, Qingqing Guo, Wei Zheng, Lüjun Chen and Jinfei Luo
- 1780 Selective electrochemical detection of 2,4,6-trinitrotoluene (TNT) in water based on poly(styrene-co-acrylic acid) PSA/SiO₂/Fe₃O₄/AuNPs/lignin-modified glassy carbon electrode
Khaled A. Mahmoud, Ahmed Abdel-Wahab and Mohammed Zourob

- 1789 Bayesian modeling of virus removal efficiency in wastewater treatment processes
T. Ito, T. Kato, K. Takagishi, S. Okabe and D. Sano
- 1796 Malt house wastewater treatment with settleable algal-bacterial flocs
Luboš Střítěský, Radka Pešoutová and Petr Hlavínek
- 1803 Effect of interaction between anionic surfactants and poly(piperazine-amide) nanofiltration membranes used for chromium(III) recovery from saline solution
P. Religa and A. Kowalik-Klimczak
- 1810 Validation of computational non-Newtonian fluid model for membrane bioreactor
Lasse Sørensen, Thomas Ruby Bentzen and Kristian Skov
- 1817 Preparation of N-doped ZnO-loaded halloysite nanotubes catalysts with high solar-light photocatalytic activity
Zhi-Lin Cheng and Wei Sun
- 1824 Photodegradation of microcystin-LR catalyzed by metal phthalocyanines immobilized on TiO₂-SiO₂ under visible-light irradiation
Guotao Peng, Zhengqiu Fan, Xiangrong Wang, Xin Sui and Chen Chen
- 1832 Detection of boron removal capacities of different microorganisms in wastewater and effective removal process
Bengü Laçın, Burcu Ertit Taştan and Gönül Dönmez
- 1840 Environmental performance of an integrated fixed-film activated sludge (IFAS) reactor treating actual municipal wastewater during start-up phase
Nitin Kumar Singh, Absar Ahmad Kazmi and Markus Starkl
- 1851 Groundwater and stream *E. coli* concentrations in coastal plain watersheds served by onsite wastewater and a municipal sewer treatment system
Charles Humphrey, Algernon Finley, Michael O'Driscoll, Alex Manda and Guy Iverson
- 1861 Adsorption of sunset yellow FCF from aqueous solution by chitosan-modified diatomite
Y. Z. Zhang, J. Li, W. J. Li and Y. Li
- 1869 Use of the ferrates (Fe^{IV-VI}) in combination with hydrogen peroxide for rapid and effective remediation of water – laboratory and pilot study
Petr Lacina and Scott Goold
- 1879 An inexact multi-objective programming model for water resources management in industrial parks of Binhai New Area, China
Y. Li, W. Li, B. Wang, X. W. Liu, Y. L. Xie and L. Liu
