

# Water Science and Technology

Volume 73, Number 4

## Contents

- 707 Biofloculant production by *Haloplanus vesicus* and its application in acid brilliant scarlet yellow/red removal  
**Chun-Ying Zhong, Hong-Gao Chen, Gang Cao, Jun Wang and Jian-Gang Zhou**
- 716 Start-up of two moving bed membrane bioreactors treating saline wastewater contaminated by hydrocarbons  
**R. Campo, N. Di Prima, G. Freni, M. G. Giustra and G. Di Bella**
- 725 A controlled wet-spinning and dip-coating process for preparation of high-permeable TiO<sub>2</sub> hollow fiber membranes  
**Qi Zhang, Hua Wang, Xinfei Fan, Shuo Chen, Hongtao Yu and Xie Quan**
- 734 Valuation of OSA process and folic acid addition as excess sludge minimization alternatives applied in the activated sludge process  
**C. L. Martins, V. F. Velho, S. R. A. Ramos, A. S. C. D. Pires, E. C. N. F. A. Duarte and R. H. R. Costa**
- 740 Dynamic control of nutrient-removal from industrial wastewater in a sequencing batch reactor, using common and low-cost online sensors  
**Jan Dries**
- 746 Mineralization of sulfamethizole in photo-Fenton and photo-Fenton-like systems  
**C. H. Wu, J. T. Wu and Y. H. Lin**
- 751 Multivariate probability distribution for sewer system vulnerability assessment under data-limited conditions  
**G. Del Giudice, R. Padulano and D. Siciliano**
- 761 Pilot scale studies on nitrification-anammox process for mainstream wastewater at low temperature  
**Karol Trojanowicz, Elzbieta Plaza and Jozef Trela**
- 769 Levels of six antibiotics used in China estimated by means of wastewater-based epidemiology  
**Su-Fen Yuan, Ze-Hua Liu, Ri-Ping Huang, Hua Yin and Zhi Dang**
- 776 A novel positively charged membrane based on polyamide thin-film composite made by cross-linking for nanofiltration  
**Ahmad Akbari, Zahra Fakharshakeri and Sayed Majid Mojallali Rostami**
- 790 Factors affecting population of filamentous bacteria in wastewater treatment plants with nutrients removal  
**Aleksandra Milobędzka, Anna Witeska and Adam Muszyński**
- 798 Dynamic modelling of nitrous oxide emissions from three Swedish sludge liquor treatment systems  
**E. Lindblom, M. Arnell, X. Flores-Alsina, F. Stenström, D. J. I. Gustavsson, J. Yang and U. Jeppsson**
- 807 Enhanced treatment of tannery wastewater in an integrated multistage bioreactor (IMBR) by the predominant bacterial strains enriched from marine sediments  
**Guangdao Huang, Guofeng Fan and Guoguang Liu**

- 818 Degradation of ethylparaben under simulated sunlight using photo-Fenton  
**Henry Zúñiga-Benítez and Gustavo A. Peñuela**
- 827 Enhancing nitrogen removal efficiency and reducing nitrate liquor recirculation ratio by improving simultaneous nitrification and denitrification in integrated fixed-film activated sludge (IFAS) process  
**Yang Bai, Yaobin Zhang, Xie Quan and Shuo Chen**
- 835 Life cycle assessment of introducing an anaerobic digester in a municipal wastewater treatment plant in Spain  
**David Blanco, Sergio Collado, Adriana Laca and Mario Díaz**
- 843 Improved dewatering of CEPT sludge by biogenic flocculant from *Acidithiobacillus ferrooxidans*  
**Jonathan W. C. Wong, Kumarasamy Murugesan, Shuk Man Yu, Mayur B. Kurade and Ammaiappan Selvam**
- 849 Effect of thermal and alkaline pretreatment of giant miscanthus and Chinese fountaingrass on biogas production  
**Valentine Nkongndem Nkemka, Yongqiang Li and Xiyang Hao**
- 857 Adsorption of hexavalent chromium by crosslinked chitosan–iron(III) in an air-lift reactor  
**Carla Albertina Demarchi and Clóvis Antonio Rodrigues**
- 866 Control of *Microthrix parvicella* and sludge bulking by ozone in a full-scale WWTP  
**Lotta Levén, Erik Wijnbladh, Malin Tuveesson, Caroline Kragelund and Sara Hallin**
- 873 Influence of flocculation on sediment deposition process at the Three Gorges Reservoir  
**Dangwei Wang, Xiaofang Liu, Zuwen Ji, Zhandi Dong and Haihua Hu**
- 881 Adsorption and photocatalytic degradation of malachite green by vanadium doped zinc oxide nanoparticles  
**L. Khezami, Kamal K. Taha, Imed Ghiloufi and Lassaad El Mir**
- 890 Research on the stability of heavy metals (Cu, Zn) in excess sludge with the pretreatment of thermal hydrolysis  
**Huimin Wu, Meng Li, Lei Zhang and Chao Sheng**
- 899 Study of novel mechano-chemical activation process of red mud to optimize nitrate removal from water  
**A. Alighardashi, H. R. Gharibi, Sh. Raygan and A. Akbarzadeh**
- 909 Contaminant removal in septage treatment with vertical flow constructed wetlands operated under batch flow conditions  
**Valerie Siaw Wee Jong and Fu Ee Tang**
- 916 Shock resistance characteristic of a spiral symmetry stream anaerobic bio-reactor  
**Xiaoguang Chen, Ruobin Dai, Xinyi Xiang, Gang Li, Zhengqi Xu, Tao Hu and Awad Abdelgadir**
- 924 Spatial–temporal distribution and fuzzy comprehensive evaluation of total phosphorus and total nitrogen in the Yangtze River Estuary  
**Ruimin Liu, Yaxin Chen, Wenwen Yu, Fei Xu and Zhenyao Shen**
- 935 Evaluation of trichloroethylene degradation by starch supported Fe/Ni nanoparticles via response surface methodology  
**Razieh Nikroo, Iran Alemzadeh, Manouchehr Vossoughi and Kamran Haddadian**
- 947 Effect of cathode electron acceptors on simultaneous anaerobic sulfide and nitrate removal in microbial fuel cell  
**Jing Cai, Ping Zheng and Qaisar Mahmood**
- 955 Removal of 4-nitrophenol from aqueous solution by adsorption onto activated carbon prepared from *Acacia glauca* sawdust  
**Prashant T. Dhorabe, Dilip H. Lataye and Ramakant S. Ingole**
- 967 Erratum: *Water Science and Technology* 72 (11), 2034–2044: A downflow hanging sponge (DHS) reactor for faecal coliform removal from an upflow anaerobic sludge blanket (UASB) effluent, Rosa Elena Yaya Beas, Katarzyna Kujawa-Roeleveld, Jules B. van Lier and Grietje Zeeman, doi: 10.2166/wst.2015.427
