Water Science and Technology

Volume 74, Number 2

Contents

295 Catalysis of CuSO₄ for total organic carbon detection based on supercritical water oxidation
Zhang Hui, Han Dongdong, Chen Yi and Lin Chunmian

302 On the preventive management of sediment-related sewer blockages: a combined maintenance and routing optimization approach
John E. Fontecha, Raha Akhavan-Tabatabaei, Daniel Duque, Andrés L. Medaglia, María N. Torres and Juan Pablo Rodríguez

309 A modular diagnosis system based on fuzzy logic for UASB reactors treating sewage
R. M. Borges, A. Mattedi, C. J. Munaro and R. Franci Gonçalves

318 Total coliphages removal by activated sludge process and their morphological diversity by transmission electron microscopy
Sihem Jebri, Fatma Hmaied, Mariem Yahya, Aouatef Ben Ammar and Moktar Hamdi

324 Characterizing shallow secondary clarifier performance where conventional flux theory over-estimates allowable solids loading rate
Glen T. Daigger, John S. Siczka, Thomas F. Smith, David A. Frank and J. A. McCorquodale

333 Tabas coal preparation plant wastewater treatment with membrane technology
Ahmad Akbari, Vahid Reza Abbaspour and Seyed Majid Mojallali Rostami

343 Application of response surface methodology (RSM) for the removal of methylene blue dye from water by nano zero-valent iron (NZVI)
Morteza Khosravi and Simin Arabi

353 Bio-plastic (poly-hydroxy-alkanoate) production from municipal sewage sludge in the Netherlands: a technology push or a demand driven process?
E. D. Bluemink, A. F. van Nieuwenhuijzen, E. Wypkema and C. A. Uijterlinde

359 Use of bauxite residue (red mud) as a low cost sorbent for sulfide removal in polluted water remediation
Yanqing Sheng, Qiyao Sun, Ruichuan Sun, Ian T. Burke and Robert J. G. Mortimer

367 Assessment of nanofiltration and reverse osmosis potentialities to recover metals, sulfuric acid, and recycled water from acid gold mining effluent
Bárbara C. Ricci, Carolina D. Ferreira, Larissa S. Marques, Sofia S. Martins and Miriam C. S. Amaral

375 Impact of carbon to nitrogen ratio and aeration regime on mainstream deammonification
M. Han, H. De Clippeleir, A. Al-Omari, B. Wett, S. E. Vlaeminck, C. Bott and S. Murthy

385 Effects of nutrient loading on Anabaena flos-aquae biofilm: biofilm growth and nutrient removals
Xiaowei Li, Qun Wei, Xiaojie Tu, Yuxuan Zhu, Yanfei Chen, Lina Guo, Jun Zhou and Hongyun Sun

393 Preparation and characterization of iron-copper binary oxide and its effective removal of antimony(III) from aqueous solution
Yongchao Li, Bing Geng, Xiaoxian Hu, Bozhi Ren and Andrew S. Hursthouse
402 Adsorption kinetics and equilibrium study of nitrogen species onto radiata pine (Pinus radiata) sawdust
Kadek D. Harmayani and A. H. M. Faisal Anwar

416 Remediation of nitrate-contaminated wastewater using denitrification biofilters with straws of ornamental flowers added as carbon source
Junjun Chang, Luyao Ma, Yuanyang Zhou, Shenghua Zhang and Weilu Wang

424 Electrophoretic deposition of titanium dioxide films on copper in aqueous media
M. Laamari, A. Ben Youssef and L. Bousselmi

431 Treatment of corn ethanol distillery wastewater using two-stage anaerobic digestion
B. Ráduly, L. Gyenge, Sz. Szilveszter, A. Kedves and S. Crognale

438 Microsieving in primary treatment: effect of chemical dosing
J. Väänänen, M. Cimbritz and J. la Cour Jansen

448 Simultaneous nitrification, denitrification and phosphorus removal (SNDPR) in a full-scale water reclamation plant located in warm climate
Qin Yang, Nan Shen, Zarraz M.-P. Lee, Guangjing Xu, Yeshi Cao, Beehong Kwok, Winson Lay, Yu Liu and Yan Zhou

457 Development and application of a procedure for evaluating the long-term integrity of membranes for the anaerobic fluidized membrane bioreactor (AFMBR)
Chungheon Shin, Kihyun Kim, Perry L. McCarty, Jeonghwan Kim and Jaeho Bae

466 Effect of competing amines on the removal of tetramethylammonium hydroxide from solution using ion exchange
H. M. Citraningrum and Jhy-Chern Liu

473 Effects of different culture media on biodegradation of triclosan by Rhodotorula mucilaginosa and Penicillium sp.
Burcu Ertit Taştan, Caner Özdemir and Turgay Tekinay

482 Limitations of the removal of cyanide from coking wastewater by ozonation and by the hydrogen peroxide-ozone process
N. Pueyo, N. Miguel, J. L. Ovelleiro and M. P. Ormad

491 Improvement of multi-parameter-based feed-forward coagulant dosing control systems with feed-back functionalities
W. Liu and H. Ratnaweera

500 Impact of aluminum chloride on process performance and microbial community structure of granular sludge in an upflow anaerobic sludge blanket reactor for natural rubber processing wastewater treatment
Nguyen Thi Thanh, Takahiro Watari, Tran Phuong Thao, Masashi Hatamoto, Daisuke Tanikawa, Kazuaki Syutsubo, Masao Fukuda, Nguyen Minh Tan, To Kim Anh, Takashi Yamaguchi and Nguyen Lan Huong

508 Ammonia nitrogen removal from acetylene purification wastewater from a PVC plant by struvite precipitation
Lei Zhu, DeMing Dong, XiYu Hua, ZhiYong Guo and DaPeng Liang

516 A parametric study of alum recovery from water treatment sludge
Mohamed Ayoub and Abdallah Abdelfattah

524 Modification of waste coal gangue and its application in the removal of Mn²⁺ from aqueous solution
Ruifang Qiu and Fangqin Cheng

535 Advanced treatment of effluents from an industrial park wastewater treatment plant by ferrous ion activated persulfate oxidation process
Songmei Zhu, Zhen Zhou, Haitao Jiang, Jianfeng Ye, Jiamin Ren, Lingyun Gu and Luochun Wang

542 A service-oriented approach to assessing the infrastructure value index
R. Amaral, H. Alegre and J. S. Matos
