Water Science and Technology

Volume 74, Number 7

Contents

1509 COD removal efficiency and mechanism of HMBR in high volumetric loading for ship domestic sewage treatment
Linan Zhu, Hailing He and Chunli Wang

1518 Innovation results of IAM planning in urban water services
M. A. Cardoso, A. Poças, M. S. Silva, R. Ribeiro, M. C. Almeida, R. S. Brito, S. T. Coelho and H. Alegre

1527 Phosphate treatment by onsite wastewater systems in nutrient-sensitive watersheds of North Carolina’s Piedmont
Charles Humphrey, Brent Serozi, Guy Iverson, Jordan Jernigan, Sushama Pradhan, Michael O’Driscoll and Eban Bean

1539 A decision classifier to classify rivers for river management based on their structure in China: an example from the Yongding river
Yinjun Zhao and Aizhong Ding

1553 The ecological filter system for treatment of decentralized wastewater
Kun Zhong, Yi-yong Luo, Zheng-song Wu, Qiang He, Xue-bin Hu, Qi-wu Jie, Yan-ting Li and Shao-jie Wang

1561 A realistic dynamic blower energy consumption model for wastewater applications
Y. Amerlinck, W. De Keyser, G. Urchegui and I. Nopens

1577 Effective removal of lead (II) ions by dead calcareous skeletons: sorption performance and influencing factors
Ai Phing Lim, Zufarzaana Zulkeflee and Ahmad Zaharin Aris

1585 Calcium-alginate/carbon nanotubes/TiO₂ composite beads for removal of bisphenol A
Maria R. Hartono, Ariel Kushmaro, Robert S. Marks and Xiaodong Chen

1594 Evaluation of unclogging aspects in horizontal subsurface flow constructed wetlands
Suymara Toledo Miranda, Antonio Teixeira de Matos, Gheila Corrêa Ferres Baptestini and Alisson Carraro Borges

1602 Comparison of wastewater treatment processes on the removal efficiency of organophosphate esters
Long Pang, Peijie Yang, Jihong Zhao and Hongzhong Zhang

1610 Short-term temperature impact on simultaneous biological nitrogen-sulphur treatment in EGSB reactor
Michal Sposob, Carlos Dinamarca and Rune Bakke

1619 Effects of DMSO and glycerol additives on the property of polyamide reverse osmosis membrane
Fengjing Wu, Xiaojuan Liu and Chaktong Au

1626 Post-denitrification using alginate beads containing organic carbon and activated sludge microorganisms
Dilawar Farhan Shams, Alexandre Rubio, Panagiotis Elefsiniotis and Naresh Singhal
1636 Coagulation behavior and floc characteristics of a novel composite poly-ferric aluminum chloride–polydimethyl diallylammonium chloride coagulant with different OH/(Fe³⁺ + Al³⁺) molar ratios
Cuizhen Sun, Jinwei Qiu, Zhibin Zhang, Taha F. Marhaba and Yanhao Zhang

1644 Adsorption of heavy metals from aqueous solutions by Mg-Al-Zn mingled oxides adsorbent
Mona E-Sayed, Gh. Eshaq and A. E. ElMetwally

1658 Photocatalytic removal of doxycycline from aqueous solution using ZnO nano-particles: a comparison between UV-C and visible light
Shabnam Pourmoslemi, Ali Mohammadi, Farzad Kobarfar and Mohsen Amini

1671 Nutrient load concept-reservoir vs. bay impacts: a case study from a semi-arid watershed
F. Selge, E. Matta, R. Hinkelmann and G. Gunkel

1680 Immobilization of PDMS-SiO₂-TiO₂ composite for the photocatalytic degradation of dye AO-7
Feigao Xu, Wencheng Tan, Heng Liu, Dan Li, Yuexiang Li and Min Wang

1689 Enhancement of photocatalytic degradation of furfural and acetophenone in water media using nano-TiO₂-SiO₂ deposited on cementitious materials
Sahar Soltan, Hoda Jafari, Shahrara Afshar and Omid Zabihi

1698 Wastewater containing Cr(VI) treatment using solar tubular reactor
Tiele Caprioli Machado and Marla Azeáro Lansarin

1706 Magnetically modified biochar for organic xenobiotics removal
Ivo Šafařík, Zdenka Madérová, Kristýna Pospišková, Hans-Peter Schmidt, Eva Baldíková, Jan Filip, Michal Křížek, Ondřej Malina and Mirka Šafaříková

1716 Characterization and biodegradability of sludge from a high rate A-stage contact tank and B-stage membrane bioreactor of a pilot-scale AB system treating municipal wastewaters
Antoine Prandota Trzcinski, Lily Ganda, Chinagarn Kunacheva, Dong Qing Zhang, Li Leonard Lin, Guihe Tao, Yingjie Lee and Wun Jern Ng

1726 Spatial and seasonal variation of organic pollutants in surface water using multivariate statistical techniques
Ioana-Coralia Feher, Zaharie Moldovan and Ioan Oprean

1736 Promotion of nitrifiers through side-stream bioaugmentation: a full-scale study
F. Stenström and J. Ia Cour Jansen

1744 Adsorption characteristics of Bisphenol-A on tailored activated carbon in aqueous solutions
Liang Yan, Di Lv, Xinwen Huang, Huixiang Shi and Geshan Zhang
