

Water Science and Technology

Volume 75, Number 2

Contents

- 247 Improving the sensitivity of the activated sludge respiration inhibition test and verifying the results using an oxidation-reduction potential electrode
F. Friedrichs, K. U. Rudolph, Bich Hanh Nguyen, D. Meinardi, W. Genthe and D. Q. Trung
- 255 Effect of optimized three-component antiscalant mixture on calcium carbonate scale deposition
Zhanhui Shen, Jialu Shi, Shuzhan Zhang, Jing Fan and JianSheng Li
- 263 Degradation of 4-chlorophenol by mixed Fe⁰/Fe₃O₄ nanoparticles: from the perspective of mechanisms
Rong Cheng, Xingyan Xue, Lei Shi, Tao Zhang, Yaping Liu, Mi Kang and Xiang Zheng
- 271 Do storm event samples bias the comparison between sewer deposits contribution?
Mohamad Rammal, Ghassan Chebbo, José Vazquez and Claude Joannis
- 281 Adsorption of methylene blue from aqueous solutions using water treatment sludge modified with sodium alginate as a low cost adsorbent
Hamid Poormand, Mostafa Leili and Marzieh Khazaei
- 296 Alternative treatments to improve the potential of rice husk as adsorbent for methylene blue
Dison S. P. Franco, Eduardo H. Tanabe, Daniel A. Bertuol, Glaydson S. dos Reis, Éder C. Lima and Guilherme L. Dotto
- 306 An approximate model on three-dimensional groundwater infiltration in sewer systems
Shuai Guo, Yulong Yang and Yiping Zhang
- 313 Nitrite inhibition and limitation – the effect of nitrite spiking on anammox biofilm, suspended and granular biomass
Markus Raudkivi, Ivar Zekker, Ergo Rikmann, Priit Vabamäe, Kristel Kroon and Taavo Tenno
- 322 The response of phytoplankton and microlayer-adapted bacteria to monolayer application in a humic, eutrophic irrigation dam
P. Pittaway and V. Matveev
- 328 Identification of groundwater contamination zone around a reclaimed landfill using carbon isotopes
D. Porowska
- 340 Removal of Cd, Cu and Zn ions from aqueous solutions using natural and Fe modified sepiolite, zeolite and palygorskite clay minerals
Fatemeh Nasser Bahabadi, Mohammad Hady Farpoor and Majid Hejazi Mehrizi
- 350 Morphology dependent adsorption of methylene blue on trititanate nanoplates and nanotubes prepared by the hydrothermal treatment of TiO₂
Graham Dawson, Wei Chen, Luhua Lu and Kai Dai

- 358 Application of Box–Behnken design for modeling of lead adsorption onto unmodified and NaCl-modified zeolite NaA obtained from biosilica
Pinar Terzioğlu, Sevil Yücel and Mehmet Öztürk
- 366 Removal of Disperse Red 60 dye from aqueous solution using free and composite fungal biomass of *Lentinus concinnus*
Gülşay Bayramoğlu, V. Cengiz Ozalp and M. Yakup Arica
- 378 Modeling the pH effects on nitrogen removal in the anammox-enriched granular sludge
Xi Lu, Zhixuan Yin, Dominika Sobotka, Kamil Wisniewski, Krzysztof Czerwionka, Li Xie, Qi Zhou and Jacek Makinia
- 387 Determination of pharmaceutical residues and assessment of their removal efficiency at the Daugavgriva municipal wastewater treatment plant in Riga, Latvia
I. Reinholds, O. Muter, I. Pugajeva, J. Rusko, I. Perkons and V. Bartkevics
- 397 One-step approach for the synthesis of CoFe₂O₄@rGO core-shell nanocomposites as efficient adsorbent for removal of organic pollutants
Z. J. Song, W. Ran and F. Y. Wei
- 406 Water transparency distribution under varied currents in the largest river-connected lake of China
Hua Wang, Yijun Zhao, Zhizhang Zhang, Yong Pang and Dongfang Liang
- 418 High spatial resolution analysis of the distribution of sulfate reduction and sulfide oxidation in hypoxic sediment in a eutrophic estuary
Rathnayake M. L. D. Rathnayake, Shogo Sugahara, Hideaki Maki, Gen Kanaya, Yasushi Seike and Hisashi Satoh
- 427 Treatment of Pb ion contaminated wastewater using hazardous parthenium (*P. hysterophorus* L.) weed
Kulbhushan Samal, Kaustubha Mohanty and Chandan Das
- 439 Chemical and microstructural analyses for heavy metals removal from water media by ceramic membrane filtration
Asmaa Ali, Abdelkader Ahmed and Ali Gad
- 451 Fenton's treatment of actual agriculture runoff water containing herbicides
Sanjeev Sangami and Basavaraju Manu
- 462 Long-term effect of metal oxide nanoparticles on activated sludge
Baranidharan Sundaram and Arun Kumar
- 474 Self-purification of marine environments for heavy metals: a study on removal of lead(II) and copper(II) by cuttlebone
Sina Dobaradaran, Iraj Nabipour, Mozhgan Keshtkar, Fatemeh Faraji Ghasemi, Tayebeh Nazarialamdarloo, Farzaneh Khalifeh, Marjan Poorhosein, Mehrnoosh Abtahi and Reza Saeedi
- 482 Relationship between biochars' porosity and adsorption of three neutral herbicides from water
Saijun Li, Jinhong Lü, Tao Zhang, Yueqiang Cao and Jianfa Li
- 490 Corrigendum: *Water Science and Technology* 74 (9), 2105–2114: Characterization of ultrafiltration of undiluted and diluted stored urine, J. Ouma, S. Septien, K. Velkushanova, J. Pocock and C. Buckley, doi: 10.2166/wst.2016.384
