Contents

1 Modal analysis of annual runoff volume and sediment load in the Yangtze river-lake system for the period 1956–2013
   Huai Chen, Lijun Zhu, Jianzhong Wang, Hongxia Fan and Zhihuan Wang

15 Effect of hydroxypropyl cellulose (HPC), polyvinylpyrrolidone (PVP) and polyethylene glycol (PEG) on Nd-TiO₂/graphene oxide nanocomposite for removal of lead(II) and copper(II) from aquatic media
   Susan Samadi, Sayed Mohammad Hosain Mirseyyifard, Mina Assari and Marzieh Hassannejad

28 Energy capture and nutrients removal enhancement through a stacked constructed wetland incorporated with microbial fuel cell
   Lei Xu, Yaqian Zhao, Tongyue Wang, Ranbin Liu and Fei Gao

35 Magnetic Schiff’s base sorbent based on shrimp peels wastes for consummate sorption of chromate
   Khalid Z. Elwakeel, Ahmed M. Elgarahy and Samya H. Mohammad

49 Evaluation of nutrients removal (NO₃-N, NH₃-N and PO₄-P) with Chlorella vulgaris, Pseudomonas putida, Bacillus cereus and a consortium of these microorganisms in the treatment of wastewater effluents
   Abril Gómez-Guzmán, Sergio Jiménez-Magaña, A. Suggey Guerra-Rentería, César Gómez-Hermosillo, F. Javier Parra-Rodríguez, Sergio Velázquez, Blanca Rosa Aguilar-Uscanga, Josue Solís-Pacheco and Orfil González-Reynoso

57 Combination of novel coalescing oil water separator and electrocoagulation technique for treatment of petroleum compound contaminated groundwater
   Sepideh Oladzad, Narges Fallah and Bahram Nasernejad

68 Upflow anaerobic sludge blanket and aerated constructed wetlands for swine wastewater treatment: a pilot study

79 Short- and long-term orange dye effects on ammonium oxidizing and anammox bacteria activities
   A. Val del Río, A. Stachurski, R. Méndez, J. L. Campos, J. Surmacz-Góraska and A. Mosquera-Corral

87 Chlorate adsorption from chlor-alkali plant brine stream
   Shyam Lakshmanan and Thanabal Murugesan

95 Design and optimization of hydrogen production from hydrothermally pretreated sugarcane bagasse using response surface methodology
   Lais Américo Soares, Juliana Kawanishi Braga, Fabricio Motteran, Isabel Kimiko Sakamoto, Edson Luiz Silva and Maria Bernadete Amâncio Varesche

106 Treatment of poultry slaughterhouse wastewater using a static granular bed reactor (SGBR) coupled with ultrafiltration (UF) membrane system
   M. Basître, Z. Rinquest, M. Njoya, M. S. Sheldon and S. K. O. Ntwampe
Monitoring accumulation sediment characteristics in full scale sewer physical model with urban wastewater
Manuel Regueiro-Picallo, Juan Naves, Jose Anta, Joaquín Suárez and Jerónimo Puertas

Using one filter stage of unsaturated/saturated vertical flow filters for nitrogen removal and footprint reduction of constructed wetlands
Ania Morvannou, Stéphane Troesch, Dirk Esser, Nicolas Forquet, Alain Petitjean and Pascal Molle

Large scale application of French reed beds: municipal wastewater treatment for a 20,000 inhabitant’s town in Moldova
F. Masi, R. Bresciani, N. Martinuzzi, G. Cigarini and A. Rizzo

Production of spore laccase from Bacillus pumilus W3 and its application in dye decolorization after immobilization

The characteristics of dissolved organic matter (DOM) in storm sewer sediments and the binding interaction with Cu(III) in four typical regions in Beijing, China
Ziyang Zhang, Kun Li, Xiaoran Zhang and Haiyan Li

Treatment of a mixed wood preservative leachate by a hybrid constructed wetland and a willow planted filter
S. Lévesque, E. Demers, J. Brisson and Y. Comeau

Synthesis of ZnO-CuO/MCM-48 photocatalyst for the degradation of organic pollutions
Yongzheng Duan and Yulian Shen

Solar radiation (PAR, UV-A, UV-B) penetration in a shallow maturation pond operating in a tropical climate
Daniel F. C. Dias and Marcos von Sperling

Fe-FeS₂ adsorbent prepared with iron powder and pyrite by facile ball milling and its application for arsenic removal
Xiaobo Min, Yangwenjun Li, Yong Ke, Meiqing Shi, Liyuan Chai and Ke Xue

Calculation method for steady-state pollutant concentration in mixing zones considering variable lateral diffusion coefficient
Wen Wu, Zhouhu Wu and Zhiwen Song

Effects of hydraulic loading rate and aeration mode on nitrogen removal and nitrogen functional gene abundances in subsurface wastewater infiltration systems
Yafei Sun, Jing Pan, Shiyue Qi and Hexin Fei

Nickel adsorption onto polyurethane ethylene and vinyl acetate sorbents
Munawar Iqbal, Zahid Ali, M. Afzal Qamar, Abid Ali, Fida Hussain, Mazhar Abbas and Jan Nisar

Enhanced treatment of secondary municipal wastewater effluent: comparing (biological) filtration and ozonation in view of micropollutant removal, unselective effluent toxicity, and the potential for real-time control
Michael Chys, Kristof Demeestere, Ange Sabine Ingabire, Jan Dries, Herman Van Langenhove and Stijn W. H. Van Hulle
