Development of hydrophilic GO-ZnO/PES membranes for treatment of pharmaceutical wastewater
O. T. Mahlangu, R. Nackaerts, B. B. Mamba and A. R. D. Verliefde

Response surface modeling of boron adsorption from aqueous solution by vermiculite using different adsorption agents: Box-Behnken experimental design
Pelin Demirci and Gülhayat Nasün Saygılı

Elevational characteristics of the archaeal community in full-scale activated sludge wastewater treatment plants at a 3,660-meter elevational scale
Lihua Niu, Xue Zhang, Yi Li, Peifang Wang, Wenlong Zhang, Chao Wang and Qing Wang

Modified ADM1 for high-rate anaerobic co-digestion of thermally pre-treated brewery surplus yeast wastewater
Liam Pettigrew, Alexander Gutbrod, Herbert Domes, Frauke Groß, Juan M. Méndez-Contreras and Antonio Delgado

Influence of surface modification by sulfuric acid on coking coal’s adsorption of coking wastewater
Lihui Gao, Hong Wen, Quanzhi Tian, Yongtian Wang and Guosheng Li

Degradation kinetics of organic dyes in water by high voltage atmospheric air and modified air cold plasma
S. K. Pankaj, Zifan Wan, William Colonna and Kevin M. Keener

Removal of calcium and magnesium ions from shale gas flowback water by chemically activated zeolite
Haiqing Chang, Teng Liu, Qiping He, Duo Li, John Crittenden and Baicang Liu

Impact of steel slag on the ammonium adsorption by zeolite and a new configuration of zeolite-steel slag substrate for constructed wetlands
Pengbo Shi, Yingbo Jiang, Hongtao Zhu and Dezhi Sun

A comprehensive evaluation of regional water safety systems based on a similarity cloud model
Yongtai Ren, Jiping Yao, Dongyang Xu and Jing Wang

Recycling of end-of-life reverse osmosis membranes by oxidative treatment: a technical evaluation
Eduardo Coutinho de Paula, Júlia Célia Lima Gomes and Miriam Cristina Santos Amaral

Tailing propensity in the ultraviolet disinfection of trickling filter and activated sludge wastewater treatment processes
Thiam C. Tan, Yaldah Azimi and Ramin R. Farnood

Estimation of water quality by UV/Vis spectrometry in the framework of treated wastewater reuse
Erwan Carré, Jean Pérot, Vincent Jauzein, Liming Lin and Miguel Lopez-Ferber

Numerical modelling of air-water flows in sewer drops
Paula Beceiro, Maria do Céu Almeida and Jorge Matos
Membrane fouling reduction in a cost-effective integrated system of microbial fuel cell and membrane bioreactor
Benai Cheng, Jie Wang, Wenbin Liu, Zhao Cui, Fanghua Bi, Hui Jia and Hongwei Zhang

A novel electro-catalytic degradation method of phenol wastewater with Ti/IrO2-Ta2O5 anodes in high-gravity fields
Jing Gao, Junjuan Yan, Youzhi Liu, Jiachen Zhang and Zhiyuan Guo

Adsorption of Hg(II) and Pb(II) ions by nanoscale zero valent iron supported on ostrich bone ash in a fixed-bed column system
Mohammad Javad Amiri, Jahangir Abedi-koupai and Saeid Eslamian

Performance of air-cathode stacked microbial fuel cells systems for wastewater treatment and electricity production
Edson Baltazar Estrada-Arriaga, Yvonne Guillen-Alonso, Cornelio Morales-Morales, Liliana Garcia-Sanchez, Erick Obed Bahena-Bahena, Oscar Guadarrama-Pérez and Félix Loyola-Morales

Flocculating and dewatering performance of hydrophobic and hydrophilic solids using a thermal-sensitive copolymer
Shulei Li, Yinfei Liao, Guosheng Li, Zhen Li and Yijun Cao

Influence of nanoparticles on filterability of fruit-juice industry wastewater using submerged membrane bioreactor
Guler Turkoglu Demirkol, Nadir Dizge, Turkan Ormanci Acar, Oyku Mutlu Salmanli and Nese Tufekci

Preventing maritime transport of pathogens: the remarkable antimicrobial properties of silver-supported catalysts for ship ballast water disinfection
C. P. Theologides, S. P. Theofilou, A. Anayiotos and C. N. Costa

Assessing biodiesel quality parameters for wastewater grown Chlorella sp.
Samadhan Yuvraj Bagul, Randhir K. Bharti and Dolly Wattal Dhar

Decomposition of the organic matter of natural and concentrated vinasse in sandy and clayey soils
Nadia Valério Possignolo-Vitti, Edna Ivani Bertoncini and André Cesar Vitti

Experimental study of using wastewater sludge as a new drag reduction agent
Hadj Djelloul Mohamed, Belhadri Mansour and Boudjenane Nasr-Eddine
