Water Science and Technology
Volume 77, Number 3

Contents

565 Combined treatment of hydroxypropyl guar gum in oilfield fracturing wastewater by coagulation and the UV/H₂O₂/ferrioxalate complexes process
Zhenchao Zhang

576 Understanding the effects of bulk mixing on the determination of the affinity index: consequences for process operation and design
Marina Arnaldos, Usman Rehman, Wouter Naessens, Youri Amerlinck and Ingmar Nopens

589 Solid–liquid separation of an effluent produced by a fixed media biofilm reactor
Bernard Patry, Étienne Boutet, Serge Baillargeon and Paul Lessard

597 Brackish water desalination using electrodialysis: predictive mass transfer and concentration distribution model along the electrodialyzer
Azadeh Ghorbani and Abbas Ghassemi

608 Characterization of sludge properties for sewage treatment in a practical-scale down-flow hanging sponge reactor: oxygen consumption and removal of organic matter, ammonium, and sulfur
Naoki Nomoto, Masashi Hatamoto, Muntjeer Ali, Komal Jayaswal, Akinori Iguchi, Tsutomu Okubo, Masanobu Takahashi, Kengo Kubota, Tadashi Tagawa, Shigeki Uemura, Takashi Yamaguchi and Hideki Harada

617 Prediction of sludge bulking using the knowledge-leverage-based fuzzy neural network
Honggui Han, Zheng Liu, Luming Ge and Junfei Qiao

628 Fe₃O₄-CS-L: a magnetic core-shell nano adsorbent for highly efficient methyl orange adsorption
Shuangzhen Guo, Jian Zhang, Xianlong Li, Fan Zhang and Xixi Zhu

638 Adsorption of Methylene blue and Rhodamine B by using biochar derived from Pongamia glabra seed cover
Neonjyoti Bordoloi, Manash Deep Dey, Rupak Mukhopadhyay and Rupam Kataki

647 Effect of Doppler flow meter position on discharge measurement in surcharged manholes
Haoming Yang, David Z. Zhu and Yanchen Liu

655 Effect of salinity on medium- and low-pressure UV disinfection of Vibrio cholerae
P. Y. Chen, X. N. Chu, L. Liu and J. Y. Hu

662 Initial conditions of urban permeable surfaces in rainfall-runoff models using Horton’s infiltration
Steffen Davidsen, Roland Löwe, Nanna H. Ravn, Lina N. Jensen and Karsten Arnbjerg-Nielsen

670 Performance analysis and experimental study on rainfall water purification with an extensive green roof matrix layer in Shanghai, China
Jiankang Guo, Yanting Zhang and Shengquan Che
Anaerobic co-digestion of sludge and microalgae grown in municipal wastewater – a feasibility study

The ion-exchanger-loop-stripping process: ammonium recovery from sludge liquor using NaCl-treated clinoptilolite and simultaneous air stripping
Markus Ellersdorfer

Immobilization of halophilic yeast for effective removal of phenol in hypersaline conditions
Yu Jiang, Kai Yang, Tao Deng, Bin Ji, Yu Shang and Hongyu Wang

Effect of salinity variation on the autotrophic kinetics of the start-up of a membrane bioreactor and hybrid moving bed biofilm reactor-membrane bioreactor at low hydraulic retention time
J. C. Leyva-Díaz, A. Rodríguez-Sánchez, J. González-López and J. M. Poyatos

Inter-stage thermophilic aerobic digestion may increase organic matter removal from wastewater sludge without decreasing biogas production
Sasha D. Hafner, Johan T. Madsen, Johanna M. Pedersen and Charlotte Rennuit

Biosorption of praseodymium (III) using Terminalia arjuna bark powder in batch systems: isotherm and kinetic studies
Krishna Kumari Swain, Pravat Manjari Mishra and Aparna Prabha Devi

Pesticide removal through wastewater and advanced treatment: full-scale sampling and bench-scale testing
J. D. Kenny, B. D. Webber, E. W. Howe and R. B. Holden

Test of precoat filtration technology for treatment of swimming pool water
Morten Lykkegaard Christensen, Morten Møller Klausen and Peter Vittrup Christensen

Variations of odorous VOCs detected by different assessors via gas chromatography coupled with mass spectrometry and olfactory detection port (ODP) system

Modification of UASB reactor by using CFD simulations for enhanced treatment of municipal sewage
Suprotim Das, Supriya Sarkar and Sanjeev Chaudhari

Release of hydrogen sulfide under intermittent flow conditions – the potential of simulation models
Natércia Matias, Rita Matos, Filipa Ferreira, Jes Vollertsen and José Saldanha Matos

Removal of crotamiton and its degradation intermediates from secondary effluent using TiO$_2$–zeolite composites
Qun Xiang, Shuji Fukahori, Youhei Nomura and Taku Fujiwara

Energy consumption of agitators in activated sludge tanks – actual state and optimization potential
K. Füreder, K. Svardal, W. Frey, H. Kroiss and J. Krampe

Immobilization of laccase onto porous polyvinyl alcohol/halloysite hybrid beads for dye removal
Cong Chao, Huijuan Guan, Jun Zhang, Yang Liu, Yafei Zhao and Bing Zhang

Using submersible fluorescence sensors to track the removal of organic matter in decentralized wastewater treatment systems (DEWATS) in real time
N. Mladenov, A. Bigelow, B. Pietruschka, M. Palomo and C. Buckley

Influence of vegetation type and temperature on the performance of constructed wetlands for nutrient removal
Hui Zhu, Qing-wei Zhou, Bai-xing Yan, Yin-xiu Liang, Xiang-fei Yu, Yoram Gerchman and Xian-wei Cheng

Development of in-house lattice-Boltzmann simulator of bioreactors for wastewater treatment: basic concepts and initial results
V. A. Fortunato, F. L. Caneppele, R. Ribeiro and J. A. Rabi

Flow-through electrosorption process for removal of 2,4-D pesticide from aqueous solutions onto activated carbon cloth fixed-bed electrodes
Edip Bayram, Çağdaş Kızıl and Erol Ayranç
