Water Science and Technology

Volume 77, Number 6

Contents

1483 Nitrogen removal via a single-stage PN-Anammox process in a novel combined biofilm reactor
Yue-mei Han, Feng-xia Liu, Xiao-fei Xu, Zhuo Yan and Zhi-jun Liu

1493 A new achievement in green degradation of aqueous organic pollutants under visible-light irradiation
Yadollah Abdollahi, Samad Sabbaghi, Ebrahim Abouzari-Itof, Hossein Jahangirian and Nor Asrina Sairi

1505 Performance of a membrane bioreactor in extreme concentrations of bisphenol A
Yassine Ouarda, Mehdi Zolfaghari, Patrick Drogui, Brahima Seyhi, Gerardo Buelna and Rino Dubé

1514 Domestic wastewater treatment by forward osmosis-membrane distillation (FO-MD) integrated system
Jie Li, Deyin Hou, Kuiling Li, Yong Zhang, Jun Wang and Xiwang Zhang

1524 Process optimization of CNP removal from industrial soft drink wastewater in a single up flow A2O with continuous feed and intermittent discharge regime
Amir Nouri and Ali Akbar Zinatizadeh

1537 Structural characteristics of extracellular polymeric substances (EPS) in membrane bioreactor and their adsorptive fouling
Xinying Su and Zhigang Zhang

1547 Removal of toxic metals using endocarp of açaí berry as biosorbent
Affonso Celso Gonçalves Jr, Daniel Schwantes, Marcelo Angelo Campagnolo, Douglas Cardoso Dragunski, César Ricardo Teixeira Tarley and Arthur Kinkas dos Santos Silva

1558 Optimization of the synthesis and operational parameters for NOM removal with response surface methodology during nano-composite membrane filtration
Nader Yousefi, Ramin Nabizadeh, Simin Nasserri, Mehdi Khoobi, Shahrokh Nazmara and Amir Hossein Mahvi

1570 Polyacrylic acid grafted silica fume as an excellent adsorbent for dysprosium(III) removal from industrial wastewater
Tian Liang, Chunjie Yan, Xujian Li, Sen Zhou and Hongquan Wang

1581 Sequencing batch reactor process for the removal of nitrogen from anaerobically treated domestic wastewater
L. Pelaz, A. Gómez, A. Letona, G. Garralón and M. Fdz-Polanco

1591 Preparation of granular activated carbons from composite of powder activated carbon and modified δ-zeolite and application to heavy metals removal
S. M. R. Seyedein Ghannad and M. N. Lotfollahi

1602 Exploring the potential of halophilic archaea for the decolorization of azo dyes
Masoomeh Selseleh Hassan Kiaeheh, Mohammad Ali Amoozegar, Sedigheh Asad and Maryam Siroosi

1612 Biosorption of cationic dyes by Pará chestnut husk (Bertholletia excelsa)
Jordana Georgin, Bianca Silva Marques, Enrique Chaves Peres, Daniel Allasia and Guilherme Luiz Dotto
1622 In situ remediation of hexavalent chromium contaminated soil by CMC-stabilized nanoscale zero-valent iron composited with biochar
Runyuan Zhang, Nuanqin Zhang and Zhanqiang Fang

1632 Assessing the impact of sea level rise due to climate change on seawater intrusion in Mekong Delta, Vietnam
D. T. Vu, T. Yamada and H. Ishidaira

1640 Assessing the robustness of raingardens under climate change using SDSM and temporal downscaling
Erle Kristvik, Guro Heimstad Kleiven, Jardar Lohne and Tone Merete Muthanna

1651 Oxidation of tartrazine with ultraviolet light emitting diodes: pH and duty cycles effects
Brandon M. Stewart, Michael E. Miller, David M. Kempisty, John Stubbs and Willie F. Harper, Jr

1660 Formulation of a minimal nutritional medium for enhanced lipid productivity in Chlorella sp. and Botryococcus sp. using response surface methodology
Rashi Vishwakarma, Dolly Wattal Dhar and Sunil Pabbi

1673 Changes in estrogenicity and micropollutant concentrations across unit processes in a biological wastewater treatment system
Jian Lin Chen, Shanthinie Ravindran, Simon Swift and Naresh Singhal

1683 The enhanced effect of activated sludge attached to the roots of Pistia stratiotes on nutrient removal for secondary effluent
Jian-Zhen Zhou, Xian-Qiu Zhang, Wen-Ming Xie, Shun-Qing Yang, Ming-Xia Du, Ke-Wei Dai and Xue Han

1689 Identifying critical components causing seasonal variation of activated sludge settleability and developing early warning tool
Xiaodong Wang, Xuejun Bi, Changqing Liu and Harsha Ratnaweera

1698 Abundance and community structure of ammonia-oxidizing bacteria in activated sludge from different geographic regions in China
Rujia He, Dayong Zhao, Huimin Xu and Rui Huang

1706 In situ continuous monitoring of nitrogen with ion-selective electrodes in a constructed wetland receiving treated wastewater: an operating protocol to obtain reliable data
Sandrine Papias, Matthieu Masson, Sébastien Pelletant, Stéphanie Prost-Boucle and Catherine Boutin

1714 The formation of hybrid carbon nanomaterial by chemical vapor deposition: an efficient adsorbent for enhanced removal of methylene blue from aqueous solution

1724 Modelling the effects of meteorological parameters on water temperature using artificial neural networks
Merve Temizyurek and Filiz Dadaser-Celik

1734 Decolourization of malachite green dye by mentha plant biochar (MPB): a combined action of adsorption and electrochemical reduction processes
Abhay Prakash Rawat and D. P. Singh

1744 Effect of water-to-cement ratio and curing method on the strength, shrinkage and slump of the biosand filter concrete body
Nicole Chan, Candice Young-Rojanschi and Simon Li

1751 Relevance of n-butanol as a reference gas for odorants and complex odors
Anders Feilberg, Michael J. Hansen, Ole Pontoppidan, Arne Oxbøl and Kristoffer Jonassen

1757 Attribute-based intervention development for increasing resilience of urban drainage systems
Chris Sweetapple, Guangtao Fu, Raziyeh Farmani, Fanlin Meng, Sarah Ward and David Butler

1765 Application of electrochemical peroxidation (ECP) process for waste-activated sludge stabilization and system optimization using response surface methodology (RSM)
Gagik Badalians Gholikandi and Khashayar Kazemirad
