Water Science and Technology

Volume 78, Number 4

Contents

721 Adsorption of Cu\(^{2+}\) and mechanism by natural biofilm
Xiaoying Cheng, Wenjia Xu, Ningyuan Wang, Yanan Mu, Jiatai Zhu and Jiaqi Luo

732 Adsorptive removal of cationic and anionic dyes using graphene oxide
V. Sabna, Santosh G. Thampi and S. Chandrakaran

743 Removal of phenols-like substances in pharmaceutical wastewater with fungal bioreactors by adding *Trametes versicolor*
M. Bernats and T. Juhna

751 Adsorption of phosphorus by alkaline Tunisian soil in a fixed bed column
Rihab Beji, Wissem Hamdi, Aida Kesraoui and Mongi Seffen

764 Biodegradation of main carbon sources in vinasse stillage by a mixed culture of bacteria: influence of temperature and pH of the medium
Agnieszka Ryznar-Luty, Edmund Cibis and Krzysztof Lutoslawski

776 Performance evaluation of hybrid OMBR-MD using organic and inorganic draw solutions
Sher Jamal Khan, Muhammad Saboor Siddique and Hafiz Muhammad Aamir Shahzad

786 Numerical simulation and experimental study of electrocoagulation grid flocculation tank
Ping Xiang, Yihui Wan, Xun Wang and Huilan Lian

795 Neural network for fractal dimension evolution
Alessandra da Silva Oliveira, Verônica dos Santos Lopes, Ubirajara Coutinho Filho, Rodrigo Braga Moruzzi and André Luiz de Oliveira

803 Enhanced adsorption performance of methylene blue from aqueous solutions onto modified adsorbents prepared from sewage sludge
Tao Chen, Bo Yan, Da-Mao Xu and Li-li Li

814 Substrate and operational conditions as regulators of fluid properties in full-scale continuous stirred-tank biogas reactors – implications for rheology-driven power requirements
Annika Björn, Luka Šafarić, Anna Karlsson, Åsa Danielsson, Jörgen Ejlertsson, Bo H. Svensson and Sepehr Shakeri Yekta

827 The use of sea shell (*Donax trunculus*) powder to remove Sr(II) ions from aqueous solutions
Aysun Bulut, Sabriye Yusan, Sule Aytas and Senol Sert

837 Application of hybrid bead, persimmon leaf and chitosan for the treatment of aqueous solution contaminated with toxic heavy metal ions
Sung-Whan Yu and Hee-Jeong Choi
Performance of the first stage of the French system of vertical flow constructed wetlands with only two units in parallel: influence of pulse time and instantaneous hydraulic loading rate

Jorge A. García Zumalacarregui and Marcos von Sperling

Improving aeration systems in saline water: measurement of local bubble size and volumetric mass transfer coefficient of conventional membrane diffusers

J. Behnisch, A. Ganzauge, S. Sander, M. P. Herrling and M. Wagner

Equilibrium, kinetics and thermodynamics of Cu(II) biosorption on Chinese chestnut shell pretreated with steam explosion

Li-Mei Qie, Zeng-Yu Yao, Guo-Wei Li, Sang-Bin Xie, Qi Yang and Jian-Hua Qi

Recovery of ammonia in anaerobic digestate using vacuum thermal stripping – acid absorption process: scale-up considerations

Wendong Tao, Anayo T. Ukwuani and Fred Agyeman

Performance of enhanced biological phosphorus removal and population dynamics of phosphorus accumulating organisms in sludge-shifting sequencing batch reactors

Yang Pan, Wenquan Ruan, Yong Huang, Qianqian Chen, Hengfeng Miao and Tao Wang

Greenhouse gas emissions from membrane bioreactors: analysis of a two-year survey on different MBR configurations

Giorgio Mannina, Kartik Chandran, Marco Capodici, Alida Cosenza, Daniele Di Trapani and Mark C. M. van Loosdrecht

Formation and performance of self-forming dynamic membrane (SFDM) in membrane bioreactor (MBR) for treating low-strength wastewater

M. Sabaghian, M. R. Mehrnia, M. Esmaieli and D. Noormohammadi

Preparation and performance of Cu2O/TiO2 nanocomposite thin film and photocatalytic degradation of Rhodamine B

Xiaojiao Yu, Song Kou, Junkun Nie, Jian Zhang, Yuchen Wei, Jinfen Niu and Binghua Yao

Genetic algorithm and artificial neural network model for prediction of discoloration dye from an electro-oxidation process in a press-type reactor

Alain Picos and Juan M. Peralta-Hernández

Treatment of methyl orange by the catalytic wet peroxide oxidation process in batch and continuous fixed bed reactors using Fe-impregnated 13X as catalyst

Jian Liu, Gang Peng, Xia Jing and Zhengji Yi

Removal of organic contaminant by municipal sewage sludge-derived hydrochar: kinetics, thermodynamics and mechanisms

Jia Wei, Yitao Liu, Jun Li, Hui Yu and Yongzhen Peng

Application of online instrumentation in industrial wastewater treatment plants – a survey in Flanders, Belgium

Hydrodynamic performance of a hybrid anaerobic baffled reactor (HABR): effects of number of chambers, hydraulic retention time, and influent temperature

Md Khalekuzzaman, Mehedi Hasan, Rezaul Haque and Muhammed Alamgir

Efficient removal of heavy metals from melting effluent using multifunctional hydrogel adsorbents

Jianhong Ma, Yuanmeng Zhang, Yanhong Tang, Yuanfeng Wei, Yutang Liu and Chengbin Liu

A feasibility study of disinfection by-product precursor removal from surface water by a membrane bioreactor acclimatized with wastewater organic matter

Stephen M. Long and Hao L. Tang
