Frontier Technology for Water Treatment and Pollutant Removal

Editorial: Frontier technology for water treatment and pollutant removal is key for securing the present, correcting the past, and sustaining the future
Puangrat Kajitvichyanukul, Charongpun Musikavong and Tanapon Phenrat

Sewage-specific enterococcal bacteriophages and multiple water quality parameters for coastal water quality assessment
Akechai Kongprajug, Namfon Booncharoen, Kanyaluck Jantakee, Natcha Chyerochana, Skorn Mongkolsuk and Kwanrawee Sirikanchana

Calibration and field application of a molecularly imprinted membrane-passive sampler for the sampling of indicator polychlorinated biphenyls in selected aquatic environments of South Africa
Dennis S. Mkhize, Laura P. Quinn, Hlengilizwe Nyoni, Bhekie B. Mamba and Titus A. M. Msagati

Fluorescence spectroscopy for assessing trihalomethane precursors removal by MIEX resin
P. Jutaporn, W. Laolertworakul, M. D. Armstrong and O. Coronell

Reliable determination of copper complex ions in synthetic wastewater using flame atomic absorption spectrophotometry
Kanokporn Supong and Parnuwat Usapein

Selenium in wastewater: fast analysis method development and advanced oxidation treatment applications
Dipti Prakash Mohapatra and Deepak M. Kirpalani

Triamine-bearing activated rice husk ash as an advanced functional material for nitrate removal from aqueous solution
Phuoc Toan Phan, Trung Thanh Nguyen, Nhat Huy Nguyen and Surapol Padungthon

Synthesis of porous pig bone char as adsorbent for removal of DBP precursors from surface water
Aunnop Wongrueng, Pharkphum Rakruam, Alongorn Siri and Adisak Siyasukh

Adsorption mechanism of dichlorvos onto coconut fibre biochar: the significant dependence of H-bonding and the pore-filling mechanism
Quach An Binh and Puangrat Kajitvichyanukul

Coagulation and adsorption as pretreatments of thin-film composite-forward osmosis (TFC-FO) for ink printing wastewater treatment
W. Maknakorn, P. Jutaporn and W. Khongnakorn

Kinetic and equilibrium modeling of biosorption of nickel (II) and cadmium (II) on brewery sludge
Rajeswari M. Kulkarni, K. Vidya Shetty and G. Srinikethan
895 Assessing local materials for the treatment of wastewater in open drains
Priyanka Jamwal, Daniel Phillips and Kim Karlsrud

905 Degradation of paraquat from contaminated water using green TiO₂ nanoparticles synthesized from Coffea arabica L. in photocatalytic process
Patcharaporn Phuinthiang and Puangrat Kajitvichyanukul

911 Efficient degradation of tetracycline by ultraviolet-based activation of peroxymonosulfate and persulfate
Jiamin Hu, Jing Zhang, Qingguo Wang, Qian Ye, Hao Xu, Guanyu Zhou and Jinfeng Lu

921 Electro-oxidation of landfill leachate using boron-doped diamond: role of current density, pH and ions
F. Agustina, A. Y. Bagastyo and E. Nurhayati

929 Degradation and transformation of natural organic matter accountable for disinfection byproduct formations by UV photolysis and UV/chlor(am)ine
Chanathip Hirun-Utok and Songkeart Phattarapattamawong

938 The efficiency of UV/S₂O₈²⁻ photo-oxidation process in the presence of Al₂O₃ for the removal of dexamethasone from aqueous solution: kinetic studies
Reza Shookohi, Hossein Faraji, Abolfazl Arabkohsar, Mehdi Salari and Mohammad Molla Mahmoudi

947 Co₃O₄/TiO₂ hetero-structure for methyl orange dye degradation
Mahabubur Chowdhury, Sarah Kapinga, Franscious Cummings and Veruscha Fester

958 TiO₂ coated on PVDF membrane for dye wastewater treatment by a photocatalytic membrane
L. Penboon, A. Khruueakham and S. Sairiam

967 Enhanced degradation of methylene blue by a solution plasma process catalyzed by incidentally co-generated copper nanoparticles
Isarawut Prasertsung, Sasin Kaewcharoen, Kornnaka Kunpinit, Wattanachai Yaowarat, Nagahiro Saito and Tanapon Phenrat

975 Coupled anaerobic ammonium oxidation and hydrogenotrophic denitrification for simultaneous NH₄-N and NO₃-N removal
Tatsuru Kamei, Rawintra Eamrat, Kenta Shinoda, Yasuhiro Tanaka and Futaba Kazama

985 Enzymatic hydrolysis of floatable fatty wastes from dairy and meat food-processing industries and further anaerobic digestion

993 Increasing activated sludge aggregation by magnetite nanoparticles addition
Dayane Gonzaga Domingos, Rosana Oliveira Henriques, Jéssica Antunes Xavier, Nelson Libardi Junior and Rejane Helena Ribeiro da Costa

1000 Nutrient concentration in sediments accumulated in pre-treatment basins of urban LID technologies
F. K. F. Geronimo, M. C. Maniquiz-Redillas, J. S. Hong and L. H. Kim

1007 Reduction of silver nanoparticle toxicity affecting ammonia oxidation using cell entrapment technique
Nguyen Thanh Giao, Tawan Limpiyakorn, Pumis Thuptimdang, Thunyalux Ratpukdi and Sumana Siripattanakul-Ratpukdi

1017 Community composition of marine and brackish water ammonia-oxidizing consortia developed for aquaculture application
P. G. Preena, Cini Achuthan, V. J. Rejish Kumar, R. Boobal, G. D. Deepa, Jayesh Puthuman, Sunitha Pouluse, I. S. Surekhamol and I. S. Bright Singh
